

MA 33 PC Controlled Audiometer

Screening made Easy and Mobile

The MA 33 is our small, fast and flexible PC audiometer for every occasion. The operation via USB connection to your PC or notebook is very easy and the MA 33 allows numerous possibilities to highly adapt the settings to your personal preferences and needs. The software offers various fast and reliable audiometry methods.

Whether you are an ENT doctor, general or occupational health practitioner, audiologist or pediatrician, the various test methods make the MA 33 the ideal device for you.

Automatic Test – Hughson-Westlake

With the optional Hughson Westlake test the MA 33 can record an audiogram without any control of an examiner. Voice prompts will instruct the test person and wrong answers will be detected.

Features at a Glance

- Air conduction and bone conduction
- Optional PILOT-Hearing TEST for children in 33 languages
- Automated Hughson-Westlake, SISI, Stenger and BPTA available
- Small, fast, flexible and highly mobile
- Intuitive handling of the clearly presented user interface
- Operate at your convenience with your mouse or keyboard
- Display and store your results in one second
- Includes MAICO Patient Database
