Letter from the CEO

2024 was characterised by stability for the companies in the William Demant Invest portfolio. In a year of continued geopolitical uncertainty, we once again saw consistent performance from the companies in the portfolio with sustained positive growth trajectories. Overall, the portfolio saw revenue growth in 2024.

On the back of a solid 2023 with overall strong business performance in a more normalised post-covid market, most of the companies in the William Demant Invest portfolio continued delivering strong performance in 2024. The market value of the companies is on par with last year, amounting to DKK 60 billion, but we have seen stable and solid business performance from all companies. Our portfolio saw a combined revenue growth of 4% to DKK 54 billion in 2024.

In terms of new investments, we increased our ownership in selected companies during the year and thus consolidated the existing portfolio to an even larger extent. Most of our companies reside in the MedTech business, and we firmly believe that the stability of this industry suits us very well. We therefore wish to expand and consolidate our ownership in the companies even further in the future, and we are confident that our current portfolio holds strong potential for future growth due to the resilient nature of the companies.

Furthermore, I want to highlight our evergreen mentality in William Demant Invest which is illustrated through our buy-and-hold approach to our investments. The past couple of years have been characterised by external, macroeconomic turmoil, which has naturally affected the valuation of our portfolio companies – but we are in this business for the long run. Thus, short-term disruptions in our active markets do not change our strategy and focus on long-term value creation in our investments.

A positive outlook for the future

Even though uncertainty still exists around the future development on the global markets, we look positively towards the future. The continued solid business performance of our companies is a clear sign of stability, and we continue to experience a portfolio of well-driven, well-managed companies with the right innovative and product-driven mindsets.

I would like to thank the employees, management and boards in the William Demant Invest portfolio for the efforts and the collaboration during 2024. I also want to extend my gratitude towards customers of the portfolio – and we look forward to an exciting 2025 based on continued strong collaboration.

About William Demant Invest

History and purpose

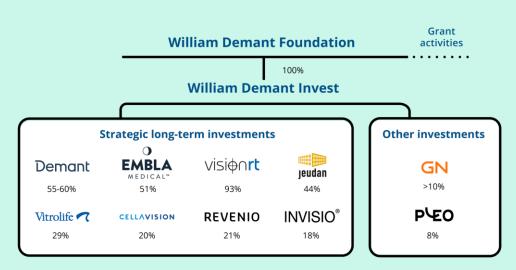

Established in 2004, William Demant Invest serves as the exclusive holding company for the comprehensive investment endeavours of William Demant Foundation. Presently, the primary source of liquidity for William Demant Invest is derived from capital returns generated by its subsidiaries and associated companies.

The main objective of William Demant Foundation is to safeguard and enhance the Demant enterprise while allocating a portion of its net income to causes defined in its charter. This commitment to a long-term perspective is evident across the majority of investments undertaken by William Demant Invest. William Demant Invest actively pursues significant involvement in the ongoing progress of subsidiaries and associated companies, aligning the foundation's dedication to fostering sustained growth.

Group structure and governance

William Demant Invest serves as the overarching entity for the investment activities of William Demant Foundation. The complete ownership tie between William Demant Foundation and William Demant Invest, along with the identical Boards of Directors, ensures the execution of investments aligns with the principles established in William Demant Foundation's charter and adheres to the investment strategy outlined by William Demant Invest.

While the implementation of the investment strategy is undertaken by William Demant Invest, decisions on exercising voting rights and buying or selling Demant shares are exclusively overseen and decided upon by William Demant Foundation. William Demant Foundation has communicated a 55-60% ownership interval – either directly or indirectly – in Demant.

The Group structure illustrated above reflects ownership figures as of 27 March 2025. Ownership in Demant represents the combined ownership of William Demant Foundation and William Demant Invest.

The strategic long-term investments are presented in the section "The William Demant Invest companies" on page 11.

Investment strategy

Investment approach

Our investment principles are focused on innovation-driven companies with proven, robust, and familiar business models

Throughout its long-lasting engagement with Demant, William Demant Invest has accumulated extensive expertise in the development and management of similar enterprises, creating a knowledge base that has profoundly influenced the determination of the investment strategy. Building on the success achieved with Demant, William Demant Invest naturally seeks for similar business characteristics in new investments, allowing for the application of this expertise.

So, what does it mean to be a company like Demant? And what are the trademarks of Demant's business model that set the standard for the investment strategy of William Demant Invest?

First of all, the high level of product innovation, on which a company like Demant builds its growth, results in natural barriers of entry because of the high level of specialist knowledge needed to develop and manufacture the products. Therefore, a company of this kind will

normally operate in niche markets with few major players and a high level of innovation. Secondly, Demant has a portfolio of products that are the same form all over the world. The distribution may vary between countries, but the product program is the same on a global scale. Demant has been through a long globalisation process with a constantly increasing number of locally based companies all over the world that together constitute a large, global business – but where the products sold, and the services provided, are more or less the same all over the world.

To sum this up, William Demant Invest mainly looks for innovation-driven companies in niche markets with a strong, unified product program and a global distribution mode. Historically, several – investments have been within the MedTech industry. William Demant Invest also takes up ownerships within other industries besides MedTech, however always in companies with a business model similar to Demant's as outlined above.

Criteria for ownership

The investment strategy for William Demant invest is summarised through the following criteria for ownership

Strong, underlying market drivers – such as favourable megatrends or long-term supportive industry or sector developments

Large total addressable markets (TAM) with sizeable growth potential and/or options to expand to adjacent markets

Attractive growth and globalisation journey ahead in which William Demant Invest can contribute as long-term owner

Preference for listed companies with a well-established organisation and a proven product concept

Innovation-driven companies

in niche markets with high entry barriers

Strong, unified product program and a global distribution model with local sales activities

Competent management with strong focus on continuous growth, innovation and product development

Revenue above DKK 250 million

with strong profitability and stable cash flow generation

About Demant A/S

Demant is a leading global hearing healthcare company, which develops, manufactures and sells hearing healthcare products and services. The company consists of three business areas: Hearing Aids, Hearing Care and Diagnostics. The former business areas; Hearing Implants and Communications are recognised as discontinued operations. Demant is listed on Nasdaq Copenhagen.

2024 at a glance

Sales in Demant increased by 4% to DKK 22,419 million. Growth in local currency was 5%, of which 2% was organic, primarily driven by Hearing Care, which saw very good momentum and delivered above-market organic growth, which was further supported meaningfully by acquisitions.

Hearing Aids growth was below the original expectations for the year, even considering the very strong comparative figures, and was negatively impacted by a generally intense competitive environment across channels, and the significant loss of market share with managed care in the US. The unit growth in global hearing aid market in 2024 is estimated to be around 4%, which is primarily driven by the US commercial market with growth in Europe and our Rest of world region being slightly lower. It is estimated that geography and channel

mix has had a slightly positive impact on ASP development.

Diagnostics saw neutral growth in 2024, impacted by a very soft global market for diagnostic instruments, headwinds experienced by our portfolio of balance equipment and adverse developments in China due to limited access to public markets.

Earnings before interest, taxes, depreciation and amortisation (EBITDA) amounted to DKK 5,963 million, which is an increase of 3% from 2023 and corresponds to an EBITDA margin of 27%.

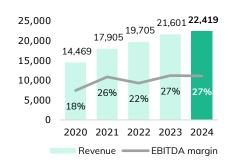

It was in connection with the Interim Report 2024 announced that Demant would initiate a significant restructuring of the Communications business as a conclusion of the strategic review announced in February 2024. The restructuring includes a rightsizing of the organisation and create a more focused business with the intension to process with the divestment of EPOS.

In Hearing Implants, which also remains categorised as discontinued operations, Demant completed the divestment of the cochlear implant (CI) business in May 2024, while the bone anchored hearing systems (BAHS) business will remain with Demant, pending a strategic review.

Embla Medical

About Embla Medical hf.

Embla Medical is a global leader in mobility solutions, including prosthetics, bracing and supports solutions and neuro orthotics. In addition, Embla Medical operates a large network of patient care clinics. The company was founded in 1971, is headquartered in Iceland and has been listed on the Icelandic Stock Exchange from 1999 to 2017 and on Nasdaq Copenhagen since 2009.

William Demant Invest started investing in Embla Medical in 2004 and has since 2018 been the majority shareholder, today holding around 51% of the share capital.

2024 at a glance

Embla Medical realised total revenue of USD 855 million which was an increase of 9% compared to 2023 in reported terms. In local currency, revenue also increased by 9%, of which organic growth was 6%.

During 2024, the company changed its name from Össur to Embla Medical, although Össur remains a product brand name for its prosthetics, bracing and supports solutions.

Prosthetics and Neuro Orthotics sales accounted for 49% of group revenue and increased organically by 9% for the year. The growth was driven by solid volume growth and positive product mix supported by strong performance in our high-end solutions. Throughout 2024, the EMEA region demonstrated strong growth

across key markets and product categories, including high-end solutions such as bionic and high-end mechanical feet.

Bracing & Supports accounted for 17% of sales and increased organically by 1%, driven by good growth in key product categories, but sales were negatively impacted by challenging market dynamics in select product categories and markets.

Patient Care accounted for 34% of group revenue and increased organically by 5%, driven by strong patient volume growth and positive mix effects, especially in EMEA. During the year, Embla Medical also introduced a new unified brand identity, ForMotion, for all patient care facilities with the goal of bringing the network of O&P clinics under a single cohesive brand.

Earnings before interest, taxes, and amortisation (EBITDA) amounted to USD 169 million in 2024, corresponding to an EBITDA margin of 20%.

About Vision RT Ltd.

Vision RT is a UK-based pioneer and leading manufacturer of surface-guided radiation therapy (SGRT). The company, which was founded in 2001, develops and manufactures camera systems and software that improves the efficiency, efficacy, and patient comfort during radiation therapy.

William Demant Invest acquired approx. 89% of the shares in Vision RT in 2018 – thus becoming the majority shareholder alongside the company's founders. In 2023, we increased our ownership to 93%.

2024 at a glance

Vision RT experienced strong overall growth in 2024, driven by both their core product offerings and their expanding service business. This growth was not just limited to one region but was seen across multiple mature markets.

The company continues to execute its strategic plans effectively, which include consolidating its market position and expanding its global footprint. This strategic execution allowed Vision RT to capitalise on new opportunities and strengthen its presence in existing as well as new markets.

Vision RT saw notable market share gains, particularly in the US and selected European markets. Their innovative and clinically proven product portfolio continues to resonate well with

customers, leading to increased adoption and preference over competitors.

Vision RT's service business also played a crucial role in the strong results for 2024. The service segment achieved double-digit organic growth, contributing to the overall stability and robustness of the company's business model.

Overall, Vision RT's strong performance in 2024 was a result of effective strategy execution, innovative product offerings, and a growing service business, all of which contributed to their market share gains and traction across different regions.

Since our investment in Vision RT in 2018, we have from first-hand witnessed the dedication and passion from the many employees of Vision RT to support cancer care patients in receiving the most efficient procedures for radiation therapy. With the most comprehensive and clinical-proven product portfolio in the market, Vision RT is set to continue to develop and pioneer the market for SGRT and taking a step closer to realise its mission of making radiation therapy more effective for cancer patients.

About Vitrolife AB

Vitrolife is an international medical device company specialising in production and development of products for assisted reproduction. The company was founded in 1994 and was one of the first companies to provide IVF laboratories with high quality ready-to-use culture media. The company is headquartered in Gothenburg, Sweden, and is listed on Nasdaq Stockholm.

In 2014, William Demant Invest divested its 31% share in Unisense FertiliTech A/S to Vitrolife in exchange for shares in the company and has in the following years increased the ownership. William Demant Invest has since 2017 been the largest shareholder in Vitrolife and today holds around 29% of the shares.

2024 at a glance

Vitrolife increased total revenue by 3% to SEK 3,609 million. In local currency, the growth was 4%, which was entirely organic.

Consumables and Technologies delivered record-high revenue with annual growth in local currency of 10% and 16%, respectively. While the development in Consumables was driven by record-high sales of media and strong growth in disposable devices – especially in EMEA and Americas – Technologies was driven by increased adoption of the Time Lapse system, EmbryoScope®, and an increase in revenue per installed device, globally.

The former business area Genetic Services was in connection with the Q1 reporting renamed to Genetics. This was a direct result of moving the product area Genomics - which includes genetic test kits – from Consumables to the renamed Genetics business area.

Overall, Genetics saw another challenging year with sales declining by 5% as mixed result of modest growth in the Genetic services area, while sale of genetic test kits declined significantly.

2024 was the first full year with Bronwyn Brophy as the CEO of Vitrolife. The executive management team was further strengthened with the appointment of Helena Wennerström as acting CFO in December and the appointment of Ermanno Sironi as Chief Operating Officer after the end of the reporting period.

Earnings before interest, taxes, depreciation, and amortisation (EBITDA) amounted to SEK 1,225 million, corresponding to an EBITDA margin of 34%.

About CellaVision AB

CellaVision is a global leader of digital solutions for medical microscopy in the field of hematology. The company develops analysers, software and applications that make it easier, faster, and more efficient to carry out blood cell analysis, ranging from among others preclassification of white-blood cell types to morphological characteristics of red-blood cells. The company is headquartered in Lund, Sweden, and has since 2011 been listed on Nasdaq Stockholm.

CellaVision

William Demant Invest started investing in CellaVision in 2017 and with an ownership of 20%, William Demant Invest is the largest shareholder in the company.

2024 at a glance

In 2024, CellaVision increased total revenue to SEK 723 million, corresponding to an increase of 7%, which was unchanged in local currency and entirely organic, demonstrating solid performance following a period of market normalisation.

While regional performance varied, EMEA and APAC delivered strong growth, with revenues increasing by 21% and 39%, respectively. Growth in these regions was primarily driven by increased demand across multiple markets and large-scale laboratory implementations. Meanwhile, the Americas region faced headwinds, declining by 14%, mainly due to political

uncertainty in the US affecting hospital investment cycles.

Despite a more competitive landscape, CellaVision continues to strengthen its market leadership in digital cell morphology. The strategic alliance with Sysmex, announced earlier in the year, serves as a strong validation of CellaVision's position and is expected to contribute positively to future growth.

Furthermore, CellaVision made progress in its innovation pipeline, with ongoing clinical trials for a new bone marrow analysis application, aiming for CE marking by the end of 2025. Additionally, the planned integration of Fourier Ptychographic Microscopy (FPM) into the next generation of hematology products underscores CellaVision's commitment to diagnostic advancement.

Earnings before interest, taxes, depreciation, and amortisation (EBITDA) amounted to SEK 219 million, corresponding to an EBITDA margin of 30%.

About Revenio Group Oyj

Revenio operates within ophthalmological devices and software solutions for eye care. The company develops tonometers, fundus imaging devices, perimeters and clinical software solutions under the iCare brand focusing on early-stage detection of globally prevailing eye diseases, including glaucoma, diabetic retinopathy, agerelated macular degeneration (AMD) and cataract as well as the monitoring of these diseases during the treatment process. Revenio is headquartered in Helsinki, Finland, and is listed on Nasdaq Helsinki.

William Demant Invest started investing in Revenio in 2018 and is today the largest shareholder with 21% ownership.

2024 at a glance

Revenio achieved total revenue of EUR 104 million in 2024, marking a 7% increase from 2023. In local currencies, the growth was 6% and entirely organic. Following a soft first quarter, the operating environment improved as the year progressed, and the year ended on a strong note.

In 2024, the US accounted for 50% of total revenue, while the EMEA region, Latin America and Canada in total accounted for 3% and the APAC region accounted for 17%.

During the year, Revenio continued to strengthen its market position by expanding the Al-driven iCare ILLUME screening solution into new markets, and the number of iCare ILLUME screening sites quadrupled. In addition, iCare ILLUME obtained marketing approval from the Chinese authorities, while the marketing approval process in the United States remains ongoing.

In August, Revenio took a major step in advancing its AI capabilities with the acquisition of the Dutch company, Thirona Retina B.V. The integration of Thirona's RetCAD software into the iCare ILLUME platform enhances Revenio's ability to detect and monitor eye diseases through artificial intelligence-driven screening. This strategic acquisition supports Revenio's vision of delivering holistic eye care solutions by combining state-of-the-art devices, software, and analytics to improve clinical outcomes and expand its presence in the global ophthalmic market.

Earnings before interest, taxes, depreciation, and amortisation (EBITDA) was unchanged from last year at EUR 30 million corresponding to an EBITDA margin of 29%. Adjusted for one-off costs, the EBITDA margin was 30%.

About INVISIO AB

INVISIO is a Danish-based company operating within advanced communication systems that help professionals in noisy and mission-critical environments to work more safely and effectively while protecting their hearing.

The company offers personal communication equipment and hearing protection for primarily defence and public safety customers. The product portfolio includes headsets, control units, cables and an intercom system, that enables users of personal equipment to communicate within a group, e.g. in a vehicle, as well as with individuals in the field while being on the move. INVISIO is listed on Nasdaq Stockholm and headquartered in Copenhagen, Denmark.

William Demant Invest started investing in INVISIO in 2020 and today owns approx. 18% of the company.

2024 at a glance

INVISIO increased its total revenue to SEK 1,807 million, corresponding to an increase of 46%, which was unchanged in local currency and entirely organic. Total revenue includes a high-volume, third-party radio order for radio systems. Adjusted for this, growth was 32 %.

2024 was a very strong year for INVISIO, fuelled by a robust market and the company's past investments in R&D, sales, and marketing. The company achieved

record-high order intake and total revenue for the year, supported by strong market activity and high demand for INVISIO's products, particularly in Europe, where long-term equipment upgrades remain a key driver. Towards the end of the year, the company saw the initial impact from increased European defence budgets starting to materialise and these are expected to increasingly support growth in the coming years.

During the year, INVISIO partnered with the U.S. Defense Innovation Unit to codevelop INVISIO Link, which was launched in the second half of the year and adds wireless capabilities to the intercom system and hereby bridging the gap between dismounted in the field and mounted users in vehicles. After the end of the reporting period, INVISIO further acquired the UltraLynx™ product line from the UK company, Ultra PCS, enhancing its tactical body-worn system capabilities.

Earnings before interest, taxes, depreciation, and amortisation (EBITDA) amounted to SEK 463 million, corresponding to an EBITDA margin of 26%, which was unchanged from last year but negatively impacted by the third-party radio order.

The WDI companies

Jeudan

About Jeudan A/S

Jeudan is Denmark's largest publicly listed real estate and service company. Jeudan's activities consist of investment in and managing of commercial and residential properties, mainly in Copenhagen and Frederiksberg.

William Demant Invest started investing in Jeudan in 2004 and today holds around 44% of the shares.

2024 at a glance

Jeudan's revenue remained consistent with the previous year and was within company guidance. However, lower investment activity, due to continued reduced supply of properties within Jeudan's strategic focus, impacted revenue growth.

The lower-than-expected investment activity was primarily due to continued low supply of properties in Jeudan's strategic focus areas. Despite this, there are signs of improving supply, which could lead to a more favourable investment environment in the future.

95% of Jeudan's properties are located in their strategic focus areas, namely the city centre of Copenhagen and Frederiksberg. This focus was further strengthened by the acquisition of two new properties in 2024 in Copenhagen: Rosenborggade 15-17 and Folke Bernadottes Allé 45.

Jeudan's service business made a solid and value-added contribution to group revenue. This segment continues to distinguish Jeudan from other property companies, supported by a high occupancy rate of 95.9% by year-end.

Earnings before interest and taxes (EBIT) were DKK 1,080 million, showing a stable development compared to 2023. The net result increased to DKK 113 million from a loss of DKK 828 million, driven by positive value adjustments of Jeudan's property portfolio, which outweighed the negative impact from value adjustments of Jeudan's financial obligations.

By year-end, Jeudan's property portfolio had a book value of over DKK 35 billion, spread across 198 properties and totaling almost 1 million square meters.

Overall, Jeudan managed to maintain stability in a challenging market, with hopes for improved investment conditions moving forward. Their strategic focus on prime locations and a strong service business continue to underpin their robust business model.

Our approach to ESG

Being an investment company, it is the impact of our investments that represents our contribution to the sustainable development goals. Sustainability management is a key topic when we evaluate potential new investments and when actively engaging with our portfolio companies.

Since William Demant Invest was established in 2004, we have invested in several companies within the healthcare industry. Through them, we have primarily contributed to Sustainable Development Goal number 3; Good health and wellbeing, contributing with research and innovation and offering treatment and new possibilities for people with health challenges.

Aside from our contribution to good health and well-being, we pay attention to a list of ESG parameters and policies, such as ethical business practices, environment and climate, diversity and talent retainment and attraction, both when evaluating new potential investment opportunities and as part of our active ownership strategy through our board representation.

This approach acts to reduce ESG risks in new potential investments, and with our active ownership we manage ESG risks of our existing portfolio. We do not expect perfection when we invest in new companies but consider it imperative to use our role as investor to drive progress on these important topics.

The companies in our portfolio all work diligently with ESG policies and frameworks, and we continuously monitor and follow up on the ESG performance through our board representation and other interactions with the companies over the year.

Gender diversity in the Board of Directors

At the end of 2024, the Board of Directors of William Demant Invest consisted of four members of which two are female and two are male. The Board of Directors now has the target of maintaining the even gender distribution. As the total number of employees in William Demant Invest is less than 50, no specific targets regarding the

share of the underrepresented gender have been set at other management levels.

| Board of Directors | 2024 |
|--|------|
| Total number of board members | 4 |
| Share of the underrepresented gender (%) | 50 |
| Target share (%) | 50 |
| Year of achieving target | N/A |

2024 Progress

In 2024, we were pleased to see progress across the companies in our portfolio. A highlight of 2024 was the publication of the first CSRD-compliant annual report by Demant. Embla Medical also made strides in 2024 towards CSRD-compliant reporting in the future. Both companies demonstrate how sustainability is an integral part of the companies' strategies and management.

In William Demant Invest, we started to prepare for annual reporting to be compliant with CSRD in the future.

These preparations provide a sound basis for updating and improving how we manage sustainability in William Demant Invest.

ESG Reporting

William Demant Invest publishes a separate ESG Report that serves as the statutory report to be presented under sections 99a and 99d of the Danish Financial Statements Act.

Please find the report here: https://www.demantinvest.com/esg-report/2024

Financial review

The consolidated income statement and balance sheet of William Demant Invest comprise three subsidiaries – Demant, Embla Medical, Vision RT – as well as the parent company William Demant Invest.

Income statement

William Demant Invest's consolidated revenue for the full year amounted to DKK 29,287 million compared to DKK 27,854 million in 2023, corresponding to a growth of 5%.

Earnings before interest, taxes, depreciation and amortisation (EBITDA) amounted to DKK 7,601 million resulting in an EBITDA margin of 26% compared to a margin of 22% in 2023. Operating profit (EBIT) was DKK 5,720 million corresponding to a growth of 32%. Profit before tax was DKK 3,907 million compared to DKK 2,157 million in 2023.

In 2024, the profit for the year amounted to DKK 2,411 million for the Group, and William Demant Invest's share of the net result was DKK 1,115 million. Profit for the year is deemed satisfactory and is in line with management expectations.

Equity and capital structure

As of 31 December 2024, the Group's total assets amounted to DKK 64,696 million.

This is an increase of 5% compared to 31 December 2023, which is primarily due to an increase in goodwill related to acquisitions partly offset by an impairment in associates. Positively impacted by profit, consolidated equity in 2024 increased by 5% to DKK 31,778 million of which DKK 4,517 million is attributable to noncontrolling interests and DKK 27,261 million to the shareholders of William Demant Invest.

No dividends have been paid out to William Demant Foundation in 2024 or 2023.

Cash flows

Overall, the Group continued to generate strong cash flow in 2024, where cash flow from operating activities (CFFO) amounted to DKK 4,885 million in 2024 compared to DKK 5,353 million in 2023. Cash flow from investing activities amounted to an outflow of DKK 2,798 million in 2024 corresponding to a decrease in the outflow of 15% compared to 2023. Finally, cash flow from financing activities amounted to DKK -1,973 million in 2024 mainly related to repayments of borrowings and change in short-term bank facilities.

Tax

William Demant Invest's total corporate tax expensed in 2024 amounted to DKK 992 million compared to DKK 1,046 million in 2023. Tax in associated companies is paid in the respective companies.

Outlook 2025

In 2025, the financial results for the Group are expected to be in line with the growth seen in 2024 in terms of revenue, operating profit and share of profit after tax for associates.

The expectations for the Group's financial performance for 2025 are subject to uncertainties related to the global economy, which are beyond the Group's control and may cause significant deviations in the performance of the portfolio companies compared to the expectations for the year.

Knowledge resources

William Demant Invest has 14 employees but does to a great extent rely on the development and retention of knowledge resources in subsidiaries and associated companies, where we have seen an increase of 3% in the average number of employees in the Group. Further elaboration of knowledge resources can be

found in subsidiaries and associated companies' annual reports and webpages.

Risks

William Demant Invest's risks primarily relate to developments in our subsidiaries and associated companies, global healthcare and Danish commercial occupancy rates and the financial markets. For a further review of financial risks, please refer to note 4.1. Further elaboration on business-related risks can be found in subsidiaries' and associates' annual reports and webpages.

Research and development activities

William Demant Invest's research and development activities are placed in subsidiaries and associated companies. Further elaboration on research and development activities can be found in subsidiaries' and associates' annual reports and webpages.

Statement by management

The Board of Directors and the Executive Board have today reviewed and approved the Annual Report 2024 of William Demant Invest A/S for the financial year 1 January – 31 December 2024.

The consolidated financial statements are prepared and presented in accordance with IFRS Accounting Standards as adopted by the EU and additional requirements in the Danish Financial Statements Act. The Parent financial statements are prepared and presented in

accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the Parent financial statements give a true and fair view of the Group's and the Parent's assets, liabilities and financial position at 31 December 2024, of the results of the Group's and the Parent's operations and of the Group's cash flows for the financial year 1 January to 31 December 2024.

In our opinion, Management's statement includes a true and fair review of the development in the operations and financial circumstances of the Group and the Parent, of the results for the year and of the financial position of the Group and the Parent as well as a description of the most significant risks and uncertainties facing the Group and the Parent.

Management's statement has been prepared in accordance with the Danish Financial Statement Act.

We recommend the Annual Report 2024 for adoption at the annual general meeting.

Independent auditor's report

To the shareholder of William Demant Invest A/S

Report on the audit of the Financial Statements

Opinion

In our opinion, the Consolidated Financial Statements give a true and fair view of the Group's financial position at 31 December 2024 and of the results of the Group's operations and cash flows for the financial year 1 January to 31 December 2024 in accordance with IFRS Accounting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

Moreover, in our opinion, the Parent Financial Statements give a true and fair view of the Parent's financial position at 31 December 2024 and of the results of the Parent's operations for the financial year 1 January to 31 December 2024 in accordance with the Danish Financial Statements Act.

We have audited the Consolidated Financial Statements and the Parent Financial Statements of William Demant Invest A/S for the financial year 1 January to 31 December 2024, which comprise income statement, balance sheet, statement of changes in equity and notes, including material accounting policy information for both the Group and the Parent, as well as statement of comprehensive income and cash flow statement for the Group. Collectively referred to as the "Financial Statements".

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Statement on Management's Statement

Management is responsible for Management's Statement.

Our opinion on the financial statements does not cover Management's Statement, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Statement and, in doing so, consider whether Management's Statement is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Statement provides the information required under the Danish Financials Statements Act.

Based on the work we have performed, in our view, Management's Statement is in accordance with the Consolidated Financial Statements and the Parent Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statement Act. We did not identify any

material misstatement in Management's Statement.

Management's Responsibilities for the Financial Statements

Management is responsible for the preparation of Consolidated Financial Statements that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act and for the preparation of Parent Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

 Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for

- one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group or the Parent to cease to continue as a going concern.

- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Financial report

Section 1 Operating activities and cash flow

1.1 Revenue

(DKK million)

| Revenue by geographic region | 2024 | 2023 |
|------------------------------|--------|--------|
| | | |
| Europe | 12,314 | 11,312 |
| North America | 12,383 | 11,980 |
| Asia | 2,373 | 2,426 |
| Pacific region | 1,390 | 1,325 |
| Other regions | 827 | 811 |
| Revenue | 29,287 | 27,854 |

Consolidated revenue mainly derives from the sale of goods and is broken down by the customers' geographic region.

The ten largest single customers together account for around 11% (12% in 2023) of total consolidated revenue.

Revenue generated in Denmark is DKK 374 million (DKK 326 million in 2023).

Value adjustments transferred from equity relating to derivatives made for hedging foreign exchange risks on revenue amount to DKK 5 million (DKK 106 million in 2023).

Section 1 Operating activities and cash flow

1.1 Revenue - continued

Nature of goods and services

Control is normally transferred to the customer when the goods are shipped to the customer, though delivery terms can vary and control may be transferred at a later point in time.

When selling our products to customers, control is transferred and revenue recognised, when the product is delivered to the customer at a given point in time. For hearing aid is initially fitted to the user's specific hearing loss. In some countries, the users are granted a trial period. In such cases, the transfer of control occurs when the trial period expires.

In some countries, customers are given the right to return our products for a certain period. In such cases, the number of expected returns is estimated based on an analysis of historical return rates adjusted for any known factors impacting expectations for future return rates. Revenue and cost of goods sold are adjusted accordingly, and contract liabilities (refund liabilities) and rights to the returned goods (included in prepaid expenses) are recognised for the expected returns.

The Group's activities also involve delivery of various services, such as extended warranties, warranty-related coverages (loss and damage) and after-sales services

(e.g. fine-tuning of the hearing aid, additional hearing tests and cleaning). Revenue from these services is recognised on a straight-line basis over the warranty or service period, as the user makes use of the service continuously. Some users purchase a battery package or are given batteries free of charge as part of the purchase of the hearing aid, entitling them to free batteries for a certain period. Revenue is recognised when the user receives the batteries or is given batteries free of charge as part of the purchase of the hearing aid. When available, an observable price to determine the standalone selling price for the separate performance obligations related to these services is used, and in countries where observable prices are not available, a costplus-margin method is used.

The standard warranty period for the Group's products varies between countries but is typically 12-24 months and for certain products or countries up to 48 months. The extended warranty covers periods beyond the standard warranty period or standard warranty terms. Payment terms vary significantly between countries and depend on whether the customer is a private or public customer.

The majority of the Group's products sold to end-users are invoiced and paid for after the initial accept, but some customers choose to have the products financed by us. The transaction price of such arrangements is adjusted for any significant financing benefit, and the financing component is recognised as financial income.

Accounting policies

Revenue recognition

Revenue is recognised when obligations under the terms of the contract with the customer are satisfied, which usually occurs with the transfer of control of our products and services. Revenue is measured at the consideration expected to be received in exchange for transferring goods and providing services net of the estimated discounts or other customer-related reductions.

Accounting estimates and judgements Discounts, returns etc. (estimate)

Discounts, returns etc. (estimate)
Discounts, loyalty programmes and other revenue reductions are estimated and accrued when the related revenue is recognised. To make such estimates is a matter of judgement, as all conditions are not known at the time of sale, e.g. the number of units sold to a given customer or the expected utilisation of loyalty programmes. Sales discounts, rebates and loyalty programmes are adjusted, as better information on the likelihood that they will be realised and the value at which they are expected to be realised is

obtained. Sales discounts and rebates are recognised under other cost payables as part of other liabilities, and loyalty programmes are recognised under deferred income.

Depending on local legislation and the conditions to which a sale is subject, some customers have the option to return purchased goods and obtain a refund. Based on historical return rates, an estimate is made of the number of expected returns, and a provision is recognised. This provision is updated, as returns are recognised, or when more accurate data on return rates is collected.

After-sales services (estimate)

After-sales services are provided to endusers of the Group's products and are based on estimates, as not all users make use of these services. The estimate is a matter of judgement and is based on the number of visits, the duration of an average user's visits and the expected number of users that make use of the after-sales services.

| Fees to Board of Directors | 1.7 | 1.9 |

Remuneration of the Executive BoardThe total remuneration of the Executive

The total remuneration of the Executive Board comprises:

- Wages and salaries consisting of base salary.
- A short-term incentive programme including a bonus scheme based on the development in the fair value of the net assets within William Demant Invest A/S and William Demant Foundation.

Remuneration of the Board of Directors

The remuneration of the Board of Directors comprises a fixed fee and is not incentive based.

In 2024, the basic remuneration of a member of the Parent's Board of Directors was DKK 250,000 (DKK 250,000 in 2023). The Chair of the Board of Directors receives three times the basic remuneration and the Deputy Chair one and a half time the basic remuneration.

Accounting policies

Employee costs comprise wages, salaries, social security contributions, annual and sick leave, bonuses and non-monetary benefits and are recognised in the year in which the associated services are rendered by the employees. Where William Demant Invest A/S provides long-term employee benefits, the costs are accrued to match the rendering of the service by the employees in question.

1.3 Amortisation, depreciation and impairment losses

| (DKK million) | Note | 2024 | 2023 |

For accounting policies on amortisation and depreciation, please refer to Note 3.1, Note 3.2 and Note 3.3.

1.4 Proposed dividend

The Board of Directors will at the annual general meeting propose not to distribute dividend for 2024.

Section 1 Operating activities and cash flow

1.5 Inventories

| (DKK million) | 2024 | 2023 |
|---|-------|-------|
| Raw materials and purchased components | 1,610 | 1,544 |
| Work in progress | 203 | 202 |
| Finished goods and goods for resale | 1,808 | 2,081 |
| Inventories | 3,621 | 3,827 |
| Write-downs, provisions for obsolescence etc. included in the above | 227 | 187 |
| Included in the income statement under production costs: | | |
| Write-downs of inventories for the year, net | 112 | 64 |
| Cost of goods sold for the year | 6,168 | 6,119 |

Inventories of DKK 79 million (DKK 69 million in 2023) are expected to be sold or used in production after more than 12 months.

Write-downs for the year are shown net, as breakdown into reversed write-downs and new write-downs is not possible.

Accounting policies

Raw materials, components and goods for resale are measured at cost according to the FIFO principle (according to which the most recently purchased items are considered to be in stock) or at their net realisable value, whichever is lower.

Group-manufactured finished goods and work in progress are measured at the value of direct cost, direct payroll costs, consumables and a proportionate share of indirect production costs, which are allocated on the basis of the normal capacity of the production facility. Indirect production costs include the proportionate share of capacity costs directly relating to Group-manufactured goods and work in progress.

The net realisable value of inventories is calculated as the estimated selling price less costs of completion and costs to sell.

Accounting estimates and judgements

Indirect production cost (significant judgement)

Indirect production cost allocations to inventory are based on relevant judgements related to capacity utilisation at the production facility, production time and other product-related factors. The judgements are reviewed regularly to ensure that inventories are measured at their actual production cost. Changes in judgements may affect gross profit margins as well as the valuation of work in progress, finished goods and goods for resale.

Obsolescence provision (estimate)
The obsolescence provision for inventories is based on the expected sales forecast for the individual types of hearing devices, diagnostic equipment, hearing implants, communication devices and prosthetics equipment. Sales forecasts are based on Management's expectations of market conditions and trends, and the obsolescence provision is subject to changes in these assumptions.

1.6 Trade receivables

The opening balance of trade receivables in 2023 amounted to DKK 4,605 million.

Of the total amount of trade receivables, DKK 308 million (DKK 298 million in 2023) is expected to be collected after 12 months. For information on security and collateral, please refer to Credit risks in note 4.1.

| (DKK million) | 2024 | 2023 |

Accounting policies

Trade receivables and contract assets are measured at amortised costs less expected lifetime credit losses.

For trade receivables, the Group has a simplified approach to determining the expected credit loss. The allowance for credit loss is measured through a provision matrix. To measure the expected credit loss, trade receivables have been grouped based on shared credit risk and the number of days that have passed after the due date. Allowances have also been made for trade receivables not due. For trade receivables that are considered credit-impaired, the expected credit loss is determined on an individual basis.

Accounting estimates and judgements

William Demant Invest • Annual Report 2024

Impairment of receivables (estimate)
The Group has historically incurred insignificant losses on trade receivables and contract assets.

Allowance for impairment is calculated for trade receivables. The allowance is determined as expected credit losses based on an assessment of the debtor's ability to pay. These assessments are made by local management for uniform groups of debtors based on a maturity analysis. When indicated by special circumstances, impairments are made for individual trade receivables.

Group internal credit rating

| 2024 | | expected credit loss rate | Gross carrying amount | Carrying amount |
|----------------------------|-------------------------------|---------------------------|-----------------------------|--------------------|
| Performing | 12-month expected credit loss | 0.3% | 588 | 586 |
| Underperforming | Lifetime expected credit loss | 48.2% | 170 | 88 |
| Total customer loan | s | | 758 | 674 |
| | | | | , |
| 2023 | | | | |
| Performing | 12-month expected credit loss | 0.4% | 551 | 549 |
| Underperforming | Lifetime expected credit loss | 33.5% | 179 | 119 |
| Total customer loan | S | | 730 | 668 |

Accounting policies

Customer loans are initially recognised at fair value less transaction costs and are subsequently measured at amortised costs less loss allowance or impairment losses. Any difference between the nominal value and the fair value of the loans at initial recognition is treated as prepaid discount on future sales to the customer and is recognised in the income statement as a reduction of revenue when the customer purchases goods from the Group.

The fair value of customer loans at initial recognition is measured as the present value of future repayments on the loan discounted at a market interest rate. The effective interest on customer loans is recognised as financial income in the income statement over the term of the loans.

A loss allowance is recognised on initial recognition and subsequently based on a 12-month expected credit loss model. If a significant increase in the credit risk has arisen since the initial recognition of the loan, a loss allowance based on expected lifetime credit loss is provided.

Accounting estimates and judgements

Accounting treatment (judgement) and impairment (estimate) of loans
The Group provides sales-related financing in the form of loans to some of its customers and business partners.
These customer loan arrangements are complex, cover several aspects of the customer relationship and may vary from agreement to agreement.

Management assesses the recognition and classification of income and expenses for each of these agreements, including whether the agreement represents a discount on future sales (judgement). Management also assesses whether there is an indication of impairment based on current economic market conditions and changes in customer's payment behaviour (estimate).

1.9 Specification of special items

| (DKK million) | 2024 | 2023 |
|--|------|------|
| Step-up gain on acquisition Adjustment of management judgement related to deferred | 324 | - |
| payments | -200 | - |
| Special items, net | 124 | - |

In 2024, the Group recognised as special items two significant, non-operational and non-cash items of DKK 124 million net. The positive impact of DKK 324 million relates to a step-up gain from the acquisition of Fuel Medical Group. This was partly offset by the adjustment of a judgement related to the accounting treatment of deferred payments of DKK 200 million in respect of a prior-year acquisition.

Impact of special items on consolidated income statement

| (DKK million) | | 2024 | | | 2023 | | | |

¹ 'Reported' is the figures reported in the income statement, while 'Adjusted' illustrates what the figures would have been, if the special items had not been presented as such in the income statement.

Accounting policies

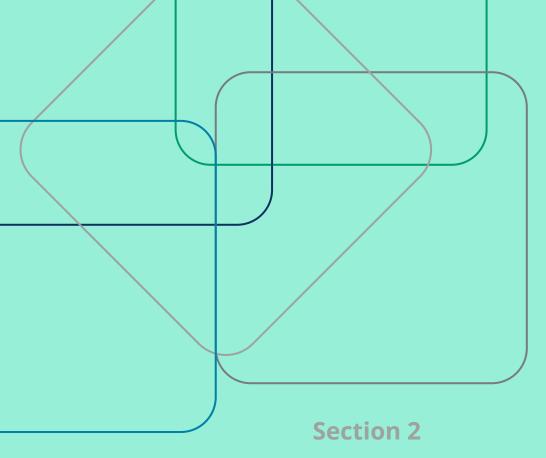

Special items are used in the presentation of consolidated income statement for the year to distinguish consolidated operating profit from significant non-recurring income and expenses from extraordinary items of a non-operational nature. Special items are shown separately from the Group's operating activities to facilitate a better understanding of the Group's performance and are presented on a net basis.

William Demant Invest • Annual Report 2024

Accounting estimates and judgements

Presentation of items as special (judgement)
Management exercises judgement to
ensure that only significant non-recurring
income and expenses from items of a
non-operational nature are included.

Adjustment to deferred payments (estimate)
Adjustments of judgements related to
deferred payments include accounting
estimates.

Exchange rates and hedging

2.1 Exchange rate risk policy

The Group has cash flow in foreign currencies due to its international operations, which exposes the Group to fluctuations in exchange rates. Hedging against exchange rate exposures ensures greater predictability in profit. The exposure of the Group mainly come from Demant Group, which manufactures most of its products at the production facilities in Poland and also distributes them from these facilities.

The general principle is to consolidate exchange rate risks at Group level, with the local entities being invoiced in their functional currencies.

The currencies that mainly contribute to the Group's exchange rate risks are US dollars, British pound, Polish zloty Canadian dollars and Australian dollars. The aim of the Group's hedging policy is to reduce the Group's exposure to exchange rate fluctuations, mainly by entering into forward exchange contracts to mitigate the Group's risks related to the impact that exchange rate fluctuations have on consolidated earnings for up to 18 months rolling forward.

Hedging is done in accordance with the Group's policy to maintain adequate hedging of the Group's material exposure to exchange rate fluctuations. It is the Group's policy to exclusively hedge financial risks arising from our commercial activities and not to undertake any financial transactions of a speculative nature. Cash flow hedging is undertaken to the extent possible to mitigate any negative effects of adverse developments in exchange rates on the consolidated operating results. Furthermore, the Group seeks to balance the on-balance net exposure in its main trading currencies.

and hedging

Due to the fixed exchange rate policy towards the euro in Denmark, the risk associated with exposure to fluctuations in this currency is considered to be limited and is not hedged.

The Group does not hedge translation risks associated with the consolidation of Group accounts.

2.2 Sensitivity analysis in respect of exchange rates

Effect on EBIT, 5% positive change in exchange rates¹⁾

Effect on equity, 5% positive change in exchange rates

| (DKK million) | 2024 | 2023 | (DKK million) | 2024 | 2023 |
|---------------|------|------|---------------|------|------|
| USD | +88 | +104 | USD | +66 | +67 |
| GBP | +41 | +50 | GBP | +35 | +61 |
| CAD | +20 | +10 | CAD | +18 | +26 |
| AUD | +13 | +29 | AUD | +11 | +10 |
| PLN | -36 | -33 | PLN | -37 | -35 |

¹ Estimated on a non-hedged basis, i.e. the total annual exchange rate effect, excluding forward exchange contracts.

The tables show the impact on the year's operating profit (EBIT) and consolidated equity, given a change of 5% in the exchange rates with the highest exposures.

The exchange rate impact on EBIT is calculated based on the Group's EBIT for each currency and does not include the possible exchange rate impact on balance sheet values in those currencies.

2.3 Hedging and forward exchange contracts

Cash flow hedging

Open forward exchange contracts at the balance sheet date, which are entered to hedge future cash flows, are specified as shown in the table, with contracts for the sale of currency being shown at negative contract values. The expiry dates reflect the periods during which the hedged cash flows are expected to be realised.

Realised forward exchange contracts, which are entered to hedge future cash flows, are recognised in the income statement together with revenue in foreign currencies that such contracts are designed to hedge. In 2024, the Group realised a gain of DKK 5 million (DKK 106 million in 2023) on forward exchange contracts, which increased the reported

Section 2 Exchange rates

and hedging

revenue for the year. The Group's forward exchange contracts were effective in 2024 and 2023.

Accounting policies

On initial recognition, derivatives are measured at fair value at the settlement date. After initial recognition, derivatives are measured at fair value at the balance

sheet date. Any positive or negative fair values of derivatives are recognised as separate items on the balance sheet as unrealised gains/losses on financial contracts. Forward exchange contracts are measured based on current market data and by means of commonly recognised valuation methods. Please refer to Note 4.5.

Any changes in fair values of derivatives classified as hedging instruments and satisfying the criteria for hedging the fair value of a recognised asset or a recognised liability are recognised in the income statement together with any changes in the fair value of the hedged asset or hedged liability. Any changes in fair values of derivatives classified as hedging instruments and satisfying the criteria for effective hedging of future transactions are recognised in other comprehensive income. The ineffective portion is recognised directly in the income statement. On realisation of the hedged transactions, the accumulated changes are recognised together with the related transactions.

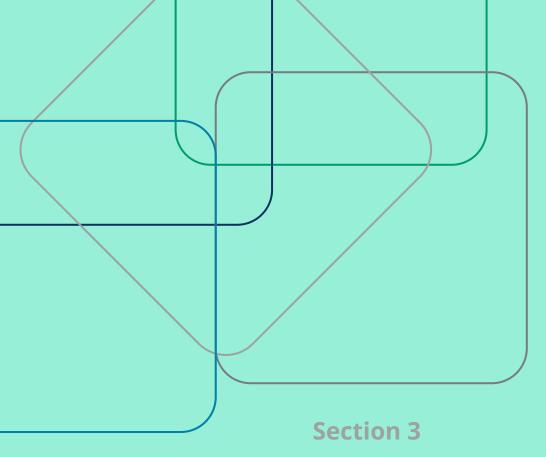

Derivatives not fulfilling the conditions for treatment as hedging instruments are considered trading investments and measured at fair value, with fair value adjustments being recognised on an ongoing basis in the income statement.

Forward exchange contracts

| (DKK million) | Expiry | Hedging period ¹⁾ | Average hedging rate | Contractual value | Fair value | Positive fair value at year-end | Negative fair value at year-end |
|-------------------|--------|---------------------------------|----------------------------|----------------------|------------|---------------------------------------|---------------------------------------|

¹ Prepayments are included in assets under development.

3.1 Intangible assets - continued

Accounting policies

On initial recognition, goodwill is recognised and measured as the difference between the acquisition cost – including the value of non-controlling interests in the acquired enterprise and the fair value of any existing investment in the acquired enterprise – and the fair values of the acquired assets, liabilities and contingent liabilities. Please refer to Accounting policies in Note 6.1.

On recognition, goodwill is allocated to corporate activities that generate independent payments (cash-generating units). The definition of a cash-generating unit is in line with the Group's managerial structure as well as the internal financial management reporting.

Goodwill is not amortised but is tested for impairment at least once a year. If the recoverable amount of a cash-generating unit is lower than the carrying amounts of property, plant and equipment and intangible assets, including goodwill, attributable to the particular cashgenerating unit, the particular assets will be written down.

Patents and licences acquired from third parties are measured at cost less accumulated amortisation and impairment losses. Patents and licenses are amortised on a straight-line basis over their estimated useful lives.

Other intangible assets consist of software, other rights than patents and licenses and other intangible assets acquired in connection with business combinations, primarily brand value, customer relationships and non-compete agreements.

Other intangible assets are measured at cost less accumulated amortisation and impairment losses. Other intangible assets are amortised on a straight-line basis over their estimated useful lives, except for other rights which are not amortised, as the residual value of other rights is considered to exceed the cost price and is instead tested annually for impairment. Please refer to Note 3.5.

Assets under development include internally developed IT systems. Assets under development are measured at cost, which include direct salaries, consultant fees and other direct costs attributable to the development of such assets. Assets under development are not amortised, as the assets are not available for use.

Accounting estimates and judgements

Product development (judgement)
It is Management's opinion that the product development undertaken by the Group today cannot meaningfully be allocated to either the development of new products or the further development of existing products. Moreover, as the products are subject to approval by various authorities, it is difficult to determine the final completion of new products. Consequently, development costs are expensed as incurred, as the criteria for capitalisation are not considered to be met.

3.2 Property, plant and equipment

| | 2024 | | | | | 2023 | | | | | | |

¹ Prepayments are included in assets under construction.

3.2 Property, plant and equipment – continued

Accounting policies

Property, plant and equipment are recognised at cost less accumulated depreciation and impairment losses. Cost is defined as the acquisition price and costs directly relating to the acquisition until the point in time when the particular asset is ready for use. For assets produced by the Group, cost includes all costs directly attributable to the production of such assets, including materials, components, sub-supplies and payroll.

If the acquisition or the use of an asset requires the Group to defray costs for the demolition or restoration of such asset, the calculated costs hereof are recognised as a provision and as part of the cost of the particular asset, respectively.

Assets consisting of various elements will be depreciated separately if their useful lives are not the same. Property, plant and equipment are depreciated on a straight-line basis over their estimated useful lives. Land is not depreciated.

| Buildings | 25-50 years |
|---------------------------|----------------|
| Technical installations | 2-10 years |
| Plant and machinery | 3-10 years |
| Plant and machinery | 20-25 years |
| Other plant, fixtures and | |
| operating equipment | 3-10 years |
| IT hardware and software | 2-5 years |
| Leasehold improvements | Up to 10 years |

Accounting estimates and judgements

Useful life and residual value (estimate)
The depreciation basis is cost less the estimated residual value of an asset after the end of its useful life. The residual value is the estimated amount, which could after deduction of costs to sell be obtained through the sale of the asset today, such asset already having the age and being in the state of repair expected after the end of its useful life. The residual value is determined at the time of acquisition and is reviewed annually. If the residual value exceeds the carrying amount, depreciation will be discontinued.

Depreciation methods, useful lives and residual values are reviewed annually. Property, plant and equipment are written down to their recoverable amounts, if these are lower than their carrying amounts.

3.3 Leases

| (DKK million) | 2024 | 2023 |

| Short-term lease expenses | 50 | 46 |
| Low-value assets | 8 | 6 |

Approx. 96% of the Group's leases consist of property agreements. The lease terms can be up to twenty years but are normally up to ten years and may contain extension and termination options. The carrying amounts of vehicles and other equipment is DKK 162 million (DKK 148 million in 2023). Management exercises significant judgement in determining whether it is reasonably certain that these extension and termination options will be exercised.

Accounting policies

Lease assets

Lease assets and liabilities are recognised in the balance sheet at the commencement date of the contract, if it is or contains a lease. Lease assets are recognised at cost less accumulated depreciation and impairment.

Cost is defined as the lease liability adjusted for any lease payments made at or before the commencement date. Lease assets are depreciated on a straight-line basis over the lease term.

Lease liabilities

Lease liabilities are measured at the present value of future payments, using the interest rate implicit in the lease agreement. Lease payments are discounted, using the Group's incremental borrowing rate adjusted for the functional currencies and length of the lease term, if

the implicit interest rate in the lease agreement cannot be determined.

William Demant Invest · Annual Report 2024

Lease payments contain fixed payments less any lease incentives receivable, variable lease payment that depend on an index or a rate as well as payments of penalties for terminating the lease, if the terms of the lease warrants that the Group exercises that option.

The lease liability is remeasured if or when the future payment or lease term changes. Any net remeasurement of the lease liability is recognised as an adjustment to the lease asset. If the carrying amount of the lease asset is reduced to zero, the adjustment will be recognised in the income statement.

Additional information

Short-term lease expenses, low-value assets and variable lease payments are classified as operating expenses in the income statement.

Please refer to Note 4.4 for a maturity analysis of the lease liabilities.

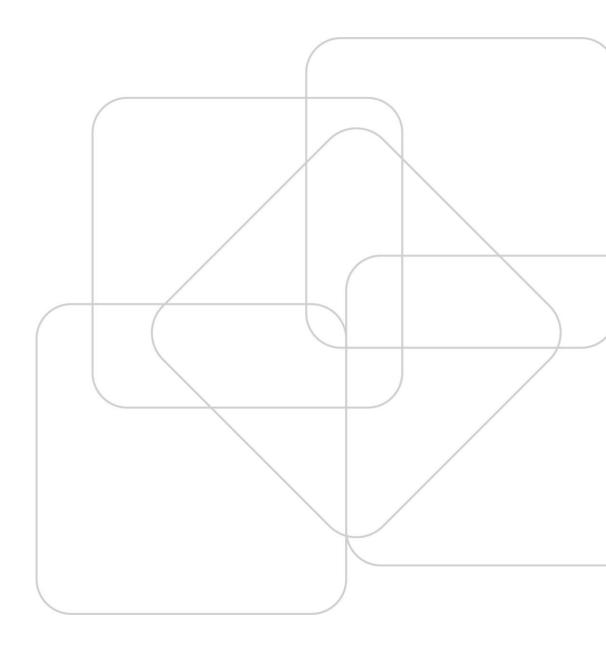

3.3 Leases - continued

Accounting estimates and judgements

Lease term (judgement)

The lease term is the period during which the lease contract is enforceable. If the original expiry date of a lease contract has passed, typically in the case of property leases, but the contract continues without a determined expiry date, the lease term is set for an estimated period during which the lease contract is expected to be enforceable. This assessment is based on Management's judgement and takes into consideration the location of the lease, capitalised leasehold improvements and the experience with similar leases for the specific area.

Extension and termination options (significant judgement)
When determining the lease term for lease agreements containing extension and termination options, Management considers circumstances that create a financial incentive to exercise an extension option or not to exercise a termination option. Extension and termination options are only included in the lease term if it is reasonably certain that a lease will be extended/terminated.

¹ Included in non-current and current liabilities, respectively. Financial liabilities consists of borrowings, deposits and lease liabilities.

Transactions with associates

Under the provisions of contracts concluded with associates, the Group is not entitled to receive dividends from certain associates. This is reflected in the profit included in the income statement, as no profit is recognised if the Group is not entitled to receive dividends.

Accounting policies

Investments in associates are recognised and measured using the equity method, i.e. investments are recognised in the balance sheet at the proportionate share of the equity value determined in accordance with the Group's accounting policies after the deduction and addition of proportionate intra-group gains and losses, respectively, and after the addition

of the carrying amount of any goodwill. The proportionate shares of profit after tax in associates are recognised in the income statement after the year's changes in unrealised intra-group profits less any impairment loss relating to goodwill.

The proportionate shares of all transactions and events, which have been recognised in other comprehensive income in associates, are recognised in the consolidated other comprehensive income. On the acquisition of interests in associates, the acquisition method is applied.

| Transactions with associates | 2024 | 2023 |

3.5 Impairment testing

Impairment testing is carried out for the Group's three cash-generating units: (1) Prosthetics, Bracing & Supports, (2) Radiotherapy and (3) Hearing Healthcare. Based on the impairment tests performed, a material excess value was identified in each cash-generating unit, compared to the carrying amount, for which reason no impairment of goodwill was made at 31 December 2024. This conclusion is supported by the fact that the market capitalisations of Demant A/S and Embla Medical hf. on Nasdaq Copenhagen by far exceeds the equity value of the companies.

The impairment testing is performed as a test of the value in use, including a five-year budget/projection period from 2025-2029.

Future cash flows are based on the budget for 2025, on strategy plans and on projections hereof. Projections extending

beyond 2025 are based on general parameters, such as expected market growth, selling prices and profitability assumptions.

The market growth rate in the noninvasive orthopaedics, radiation oncology and the hearing aid industry is predominantly determined by the following factors:

Prosthetics, Bracing & Supports

- Growth in emerging markets due to increased utilisation of prosthetic solutions in the markets, better healthcare coverage and increasing disposable income.
- Increased utilisation of higher quality prosthetics.
- Increasing share of elderly with more active lifestyles.

Radiotherapy

- Surface Guided Radiation Therapy (SGRT) becoming standard of care in all major markets driving market growth and increased penetration.
- Vision RT is the clear market leader and SGRT innovator with 80-95% market shares in key geographies.
- Growing demographics and an increasing share of elderly in the population driving demand for cancer care treatment and SGRT.

Hearing Healthcare

- Growing demographics and an increasing share of elderly in the population driving stable volume growth in the hearing aid market.
- Increased penetration rates of hearing healthcare solutions due to increased awareness, higher affluence and improved availability.
- Expansion of diagnostic instruments and services across the world.

Sensitivity calculations show that even a significant increase in the discount rates or a significant reduction of the growth assumptions will not change the outcome of the impairment tests. Apart from goodwill, all intangible assets have limited useful lives.

The goodwill allocation per cashgenerating unit is presented in the table. The terminal values for the period after 2029 and the discount rates used in the impairment tests for the four cashgenerating units are based on the growth assumptions in the table.

| | | 2024 | | 2023 | | | | |
|---------------------------------|-------------------------|--------------|--------------------------|----------------------|---------------|--------------------------|--|--|
| (DKK million) | Terminal growth rate | WACC | Carrying amount goodwill | Terminal growth rate | WACC | Carrying amount goodwill | | |

| | | | 25,247 | | | 22,826 | | |

¹ In 2024, the Communications business was classified as held for sale. Please refer to Note 6.2.

3.5 Impairment testing - continued

Accounting estimates and judgements

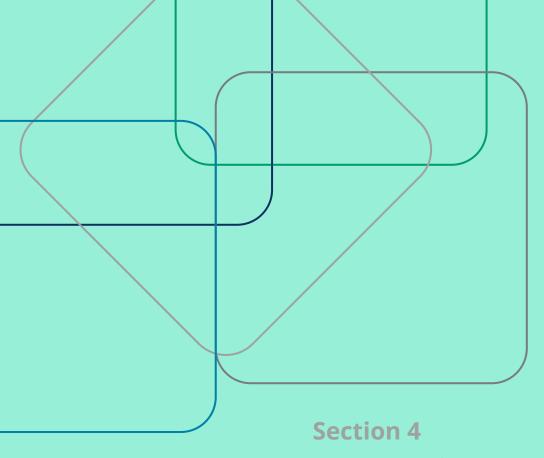

Cash-generating units (judgements) Impairment testing is carried out annually on preparation of the annual report or on indication of impairment in which discounted values of future cash flows are compared with carrying amounts. In Hearing Healthcare, the Group enterprises cooperate closely on R&D, purchasing, production, marketing and sale, as the use of resources in the individual markets is coordinated and monitored by Management in Denmark. Group enterprises are thus highly integrated. Any business activity that largely acts with autonomy in relation to the Group and whose profitability can be measured independently of the other activities constitutes a separate cash-generating unit. Management therefore considers it most appropriate to separate the activities into three cash-generating units, Prosthetics, Bracing & Supports, Radiotherapy and Hearing Healthcare for which impairment testing is carried out.

Accounting policies

The carrying amounts of property, plant and equipment and intangible assets with definite useful lives as well as investments in associates are reviewed at the balance sheet date to determine whether there are indications of impairment. If so, the recoverable amount of the particular asset is calculated to determine the need for impairment, if any. The recoverable amounts of goodwill and other intangible assets with indefinite useful lives will be estimated, whether or not there are indications of impairment.

The recoverable amount is estimated for the smallest cash-generating unit of which the asset is part. The recoverable amount is determined as the higher of the fair value of the asset or cash-generating unit less costs to sell and the value in use of such asset or unit. On determination of the value in use, estimated future cash flows will be discounted to their present values using a discount rate that reflects partly current market valuations of the time value of money, and partly the special risks attached to the particular asset or cash-generating unit for which no adjustment has been made in the estimated future cash flows. If the recoverable amount of a particular asset or cash-generating unit is lower than its carrying amount, such asset or unit is written down to its recoverable amount.

Impairment losses are recognised in the income statement. On any subsequent reversal of impairment losses due to changes in the assumptions on which the calculation of the recoverable amount is based, the carrying amount of an asset or cash-generating unit is increased to the adjusted estimate of the recoverable amount, however not exceeding the carrying amount of the asset or cash-generating unit, had the particular asset or cash-generating unit not been written down. Impairment of goodwill is not reversed.

Capital structure and financial management

4.1 Financial risk management and capital structure

Policies relating to financial risk management

Financial risk management focuses on identifying risks related to changes in the financial markets and to customers' propensity to pay for products and services.

Management monitors the financial risks of the Company to ensure that these remain well-balanced. Financial risks are managed by Treasury departments in our respective business areas, which are responsible for securing attractive funding under the prevailing market conditions and for monitoring and mitigating risks related to liquidity, interest rates and exchange rates. Risks related to counterparties are managed in the individual markets.

Capital structure, funding and liquidity

The Group remains a highly cashgenerating Group with a strong balance sheet. The Group continuously adapts its capital structure to the prevailing market conditions to secure attractive financing. We secure funding based on a strong commitment by our banks to provide longer-term bank facilities. To mitigate potential liquidity and refinancing risks, the Group has secured considerable undrawn committed credit facilities.

Interest rate risks

Due to an increasing debt level as well as marginally increasing interest rates during the year, our financial expenses increased in 2024. Furthermore, credit spreads and debt margins increased in the financial markets due to higher capital requirements imposed on the banks.

The Group seeks to maintain a balanced mix between fixed and floating rate debt. The Group's net interest-bearing debt (NIBD) amounted to DKK 22,671 million at 31 December 2024.

Exchange rate risks

The Group is exposed to exchange rate risks, as it trades with counterparties in a number of countries, and as it has cash flows in different currencies. It is therefore important to adequately balance foreign exchange rate risks to avoid unexpected adverse impacts on the Group's financial performance.

The majority of Group companies transact mainly in local currencies and are therefore exposed to limited exchange rate risks.

The Group does not hedge translation risks resulting from the consolidation of Group accounts into Danish kroner. To reduce our exchange rate exposure, we continuously seek to balance incoming and outgoing cash flows in our main

trading currencies as much as possible. To ensure predictability in terms of net profit, we hedge expected future net cash flows, mainly through forward exchange contracts with a horizon of up to 18 months.

In addition, we seek to balance our onbalance net exposure in our main trading currencies and to hedge our exposure, if relevant. It is the Group's policy to exclusively hedge financial risks arising from our commercial activities and not to undertake any financial transactions of a speculative nature.

Counterpart risks

From a commercial point of view, the Group is exposed to credit risks if our customers fail to pay for products and services provided. Such risks mainly relate to trade receivables and loans to customers or business partners, and failure to adequately manage credit risks may adversely impact the Group.

To minimise the risk of suffering losses on customers, the Group monitors the credit risks on an ongoing basis. The Group generally has a diversified customer base, and in 2024, the accumulated revenue from our ten largest customers accounted for approximately 11% of total consolidated revenue. We regularly adjust our financial accounts to reflect the current credit risks.

When granting loans to business partners, we require that our counterparties provide security in their business. In general, we estimate that the risk relative to our total credit exposure is well-balanced at Group level, and historically, we have only suffered limited credit-related losses.

William Demant Invest · Annual Report 2024

The maximum credit risk relating to receivables matches the carrying amounts of such receivables. Overall, the Group has limited deposits with financial institutions for which reason the credit risk in respect of deposits is considered to be low.

| Transaction costs | -229 | -195 |
| Financial expenses | -2,017 | -2,585 |
| Net financial items | -1,813 | -2,179 |

Accounting policies

Net financial items mainly consist of interest income and interest expenses, credit card fees and bank fees, net financial items also include interest on lease liabilities, unwinding of discounts on financial assets and liabilities, fair value adjustments of "shadow shares" under share-based remuneration programmes, fair value adjustments on other investments as well as certain realised and unrealised foreign exchange gains and losses. Interest income and interest expenses are accrued based on the principal amount and the effective interest rate. The effective interest rate is the discount rate used for discounting expected future payments attaching to the financial asset or financial liability in order for the present value to match the carrying amount of such asset or liability.

| Other liabilities | -3,220 | -2,996 |
| Financial liabilities measured at amortised cost | -27,291 | -26,525 |

The following non-financial items are included in the balance sheet and represent the difference between the table and the balance sheet: Other liabilities DKK 606 million (DKK 620 million in 2023).

Accounting policies

Debt to credit institutions and other interest-bearing debt is recognised at the

date of borrowing at the proceeds received less transaction costs. For subsequent periods, financial liabilities are measured at amortised cost in order for the difference between proceeds and the nominal value to be recognised as a financial expense over the term of the loan.

On initial recognition, other financial liabilities are measured at fair value and subsequently at amortised cost using the effective interest method, and the difference between proceeds and the nominal value is recognised in the income statement as a financial expense over the contractual maturity term.

On initial recognition, other investments classified as current assets are recognised at their fair values adjusted for any directly related costs from the purchase of the other investments. The other investments are subsequently measured at fair value based on listed prices in an active market for the same type of instrument. Unrealised value adjustments are recognised in income statement as part of net financial items. When other investments are disposed or sold, the accumulated value adjustments are reclassified to the net financial items in the income statement.

The component parts of compound instruments (convertible promissory notes) are classified separately as financial liabilities and equity if fair value at initial recognition can be allocated to the conversion option. Fair value of the conversion option is calculated as the residual value between fair value of the liability component, using prevailing market interest rates for similar nonconvertible instruments, and fair value of

the entire instrument. The liability component is subsequently measured at amortised cost.

4.4 Net interest-bearing debt, liquidity and interest rate risks

| | | Contractual | cash flows | | | Weighted average effective interest rate |
|--|---------------------|-------------|----------------------|---------|--------------------|--|
| (DKK million) 2024 | Less than 1 year | 1-5 years | More than 5 years | Total | Carrying amount | |

| Lease liabilities | -869 | -2,295 | -1,118 | -4,282 | -3,625 | |
| Net interest-bearing debt | -5,992 | -14,523 | -1,274 | -21,789 | -19,748 | |

¹ Interest-bearing receivables comprise customer loans, receivables from associates and other receivables.

Trade payables and other liabilities have a contractual maturity of less than one year, with the exception of other liabilities of DKK 1,357 million (DKK 1,122 million in 2023), which have a contractual maturity of 1-5 years. The contractual cash flows approximate their carrying amounts.

Borrowings broken down by currency, excluding hedging: 60% in Danish kroner (56% in 2023), 25% in euros (28% in 2023), 9% in US dollars (8% in 2023). 1% in Australian dollars (2% in 2023), 1% in Canadian dollars (2% in 2023) and 4% in other currencies (4% in 2023).

Financial report

4.4 Net interest-bearing debt, liquidity and interest rate risks - continued

Reconciliation of liabilities arising from financing activities

The table shows the changes in consolidated liabilities arising from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are those for which cash flows were, or future cash flows will be, classified in the consolidated cash flow statement as cash flows from financing activities.

The fair value of interest rate swap outstanding at the balance sheet date is DKK -17 million (DKK -18 million in 2023), and the contractual value of interest swap is DKK 5,641 million (DKK 1,000 million in

2022). The interest rate swap matures between 2026 and 2031.

Sensitivity analysis in respect of interest rates

Based on the Group's net debt at the end of the 2024 financial year, a rise of 1 percentage point in the general interest rate level will cause an increase in consolidated annual interest expenses before tax of approximately DKK 68 million (DKK 80 million in 2023).

The Group has limited the maximum interest rates on part of its non-current debt through an interest rate swap.

Section 4 Capital structure and financial management

Financial report

4.5 Fair value hierarchy

Methods and judgements for calculation of fair values

Other investments

Other investments are assessed on the basis of their fair value.

Derivatives

Forward exchange contracts are assessed using discounted cash flow valuation techniques. Future cash flows are based on observable forward exchange rates at the end of the reporting period and on contractual forward exchange rates discounted at a rate that reflects the credit risk related to various counterparties.

Interest rate swaps are assessed using discounted cash flow valuation techniques. Future cash flows are based on observable forward yield curves at the end of the reporting period and on contractual interest rates discounted at a rate that reflects the credit risk related to various counterparties.

Contingent considerations

Contingent considerations are measured at their fair values based on the contractual terms of the contingent considerations and on non-observable inputs (level 3), such as the financial performance and purchasing patterns of the acquired enterprises for a period of typically 1-5 years after the date of acquisition.

Fair value hierarchy for assets and liabilities measured at fair value in the balance sheet

Financial instruments measured at fair value are broken down according to the fair value hierarchy:

- Listed prices in an active market for the same type of instrument (level 1).
- Listed prices in an active market for similar assets or liabilities or other valuation methods, with all significant inputs being based on observable market data (level 2).
- Valuation methods, with any significant inputs not being based on observable market data (level 3).

Accounting policies

On initial recognition, other investments are recognised at fair value and subsequently measured at fair value in the income statement. Unrealised and realised value adjustments are recognised in net financial items in the income statement. Contingent considerations arising from the acquisition of enterprises and activities are recognised at fair value at the time of acquisition. The obligations are re-evaluated on a recurring basis at fair value.

Section 4 Capital structure and financial management

4.5 Fair value hierarchy - continued

| | Financial assets | | Other fi | | Contingent considerations | |
|---|---------------------|------|----------|------|---------------------------|------|
| (DKK million) | 2024 | 2023 | 2024 | 2023 | 2024 | 2023 |

| Financial liabilities used as hedging instruments | - | -38 | - | -38 |
| Financial liabilities at fair value through income statement | - | - | -298 | -298 |
| Contingent considerations | - | - | -543 | -543 |

There are no transfers between levels in the 2024 and 2023 financial years.

Financial assets, other financial liabilities and contingent liabilities are measured at fair value in the balance sheet based on valuation methods, with any significant inputs not being based on observable market data (level 3). The contingent considerations recognised relate to deferred payments and earn-outs. Deferred payments are not dependent on any performance obligations and will usually be paid out within 1-5 years. The earn-outs are dependent on certain performance criteria, normally revenue, and will usually be paid out within 1-5 years.

The majority of the contingent considerations are recognised as the maximum consideration to be paid, which Management has assessed to be the most likely outcome.

Section 5 Tax

| (DKK million) | 2024 | 2023 |
|--|--------|--------|
| Current tax on profit for the year | -1,107 | -1,066 |
| Adjustment of current tax, prior years | 4 | 21 |
| Change in deferred tax | 99 | 14 |
| Adjustment of deferred tax, prior years | 12 | -15 |
| Tax on profit for the year | -992 | -1,046 |
| Reconciliation of tax rates Danish corporate tax rate Differences between tax rates of non-Danish enterprises and Danish corporate tax rate | 22.0% | 22.0% |
| Impact of unrecognised tax assets | 0.5% | -2.0% |
| Permanent differences | 1.1% | 31.8% |
| Other items, including prior-year adjustments | 0.6% | -1.0% |
| Effective tax rate | 25.4% | 53.2% |

William Demant Invest Group is not impacted by OECD's/EU's Pillar Two Model Rules and local implementation hereof.

Permanent differences primarily include Danish interest limitation, R&D incentives, profit in associates, non-deductible sharebased payments, and special items.

Accounting policies

Tax on the year's profit includes current tax and any changes in deferred tax. Current tax includes taxes payable determined on the basis of the estimated taxable income for the year and any prioryear tax adjustments. Tax on changes in equity and other comprehensive income is recognised directly in equity and in other comprehensive income, respectively.

William Demant Invest • Annual Report 2024

Foreign currency translation adjustments of deferred tax are recognised as part of the year's adjustments of deferred tax.

The Group has applied the temporary exception, introduced in May 2023, from the accounting requirements for deferred taxes in IAS 12, which means that the Group neither recognises nor discloses information about deferred tax assets and liabilities related to Pillar Two income taxes.

Current tax liabilities or tax receivables are recognised in the balance sheet and determined as tax calculated on the year's taxable income adjusted for any tax paid on account. The tax rates prevailing at the balance sheet date are used for calculation of the year's taxable income.

5.2 Deferred tax

| (DKK million) | 2024 | 2023 |
|---|------|------|
| Deferred tax recognised in the balance sheet | | |
| Deferred tax assets | 945 | 857 |
| Deferred tax liabilities | -866 | -801 |
| Deferred tax, net at 31.12. | 79 | 56 |
| | | |
| | | |
| Deferred tax, net at 1.1. | 56 | 12 |
| Foreign currency translation adjustments | -25 | 7 |
| Additions relating to acquisitions | -66 | 5 |
| Changes in deferred tax | 99 | 25 |
| Adjustment of deferred tax, prior years | 12 | -15 |
| Deferred tax relating to changes in equity, net | 14 | 22 |
| Transferred to assets held for sale | -11 | - |
| Deferred tax, net at 31.12 | 79 | 56 |

The tax value of deferred tax assets not recognised is DKK 143 million (DKK 147 million in 2023) and relates mainly to tax losses and tax credits for which there is considerable uncertainty about their future utilisation. Tax losses of DKK 38 million will expire within 5-10 years, whereas other tax losses carried forward have no expiry date.

Accounting policies

Deferred tax is recognised using the balance sheet liability method on any temporary differences between the tax base of assets and liabilities and their carrying amounts, except for deferred tax on temporary differences arisen either on initial recognition of goodwill or on initial recognition of a transaction that is not an acquisition, with the temporary difference ascertained on initial recognition affecting neither net profits nor taxable income.

Deferred tax is determined on the basis of the tax rules and rates prevailing at the balance sheet date in a particular country. The effect of any changes in tax rates on deferred tax is included in tax on profit for the year, unless such deferred tax is attributable to items previously recognised directly in equity or in other comprehensive income. In the latter case, such changes will also be recognised directly in equity or in other comprehensive income. The tax base of a loss, if any, which may be set off against future taxable income, is carried forward and set off against deferred tax in the same legal tax entity and jurisdiction.

Accounting estimates and judgements

William Demant Invest • Annual Report 2024

Deferred tax assets (significant estimate)
Deferred tax assets, including the tax
value of any tax losses allowed for
carryforward, are recognised in the
balance sheet at the estimated realisable
value of such assets, either by a set-off
against a deferred tax liability or by a net
asset to be set off against future positive
taxable income. At the balance sheet date,
an assessment is made as to whether it is
probable that sufficient taxable income
will be available in the future against
which the deferred tax asset can be
utilised.

Deferred tax on temporary differences between the carrying amounts and the tax values of investments in subsidiaries and associates is recognised, unless the parent is able to control the time of realisation of such deferred tax, and it is probable that such deferred tax will not be realised as current tax in the foreseeable future.

Acquisitions and divestments

6.1 Acquisition of enterprises and activities

In 2024, a total of 54 acquisitions were completed within the Demant Group at an estimated total consideration of DKK 1,971 million, and a total of one acquisition was completed within the Embla Medical Group at an estimated consideration of DKK 911 million.

Insights and highlights

The individual acquisitions are not considered to be material and therefore not disclosed separately but grouped together with other acquisitions.

Acquisitions in the Demant Group

In 2024, the Demant Group acquired a number of enterprises or obtained significant stakes in hearing healthcare businesses, the most significant one being Fuel Medical Group in the US.

On 1 May 2024, the Demant Group acquired the remaining 51% of the shares in Fuel Medical Group and now holds 100% of the shares. Fuel Medical Group is a value-added distributor of hearing aids that operates in North America. The step

acquisition resulted in a fair value adjustment of the Demant Group's existing shares of DKK 324 million, presented as a special item in the income statement.

On 2 September 2024, the Demant Group acquired 100% of the shares in Dansk HøreCenter ApS, which operates hearing clinics across Denmark.

In addition, the Demant Group made a number of other minor acquisitions in

Europe, North America, the Pacific region and Asia in 2024.

In 2023, the Demant Group acquired a number of enterprises or obtained significant stakes in hearing healthcare businesses, the most significant ones being Mr. Optik and Flemming & Klingbeil both in Germany, the hearing aid-related activities of Goed Hulpmiddelen in Belgium and Virtualis in France.

Figures are shown at fair value on the acquisition date.

¹ Acquisitions made in the Em0062la Medical Group and Demant Group, respectively.

6.1 Acquisition of enterprises and activities - continued

On 5 January 2023, the Demant Group acquired 55% of the shares in Virtualis, a developer and manufacturer of virtual reality rehabilitation equipment based in France. As part of the agreement, a forward contract was entered into for the remaining 45% of the shares, meaning that Demant agreed to buy and the seller to sell in three tranches based on an agreed revenue multiple. The purchase price for the remaining shares is estimated based on Virtualis' current performance and on expectations for the future. The purchase price is not capped.

Insights and highlights

On 1 March 2023, the Demant Group acquired the remaining 51% of the shares in Mr. Optik and now holds 100% of the shares. Mr. Optik operates hearing clinics across Eastern Germany. The step-up resulted in a fair value adjustment of Demant's existing shares of DKK 26 million.

On 31 August 2023, the Demant Group acquired 100% of the shares in Flemming & Klingbeil, which operates hearing clinics across Berlin, Germany.

On 31 August 2023, the Demant Group acquired all the hearing aid-related activities of Goed Hulpmiddelen. The transaction was structured as an asset purchase. The activities in Goed Hulpmiddelen consist of hearing clinics in the northern part of Belgium. The

activities were integrated into the existing retail business in Belgium.

Financial report

divestments

Section 6 Acquisitions and

Acquisitions in Embla Medical

In 2024, Embla Medical acquired 100% of the shares in Fior & Gentz, a leading producer of lower limb neuro orthotics components.

In 2023, Embla Medical made a number of minor acquisitions.

Accounting treatment

In respect of the acquisitions, the Group paid a total acquisition cost of DKK 2,882 million, which exceeded the fair values of the acquired assets, liabilities and contingent liabilities. Such positive balances in value can be attributed to expected synergies between the activities of the acquired activities and the Group's existing activities, to the future growth opportunities and to the value of staff competencies in the acquired businesses. These synergies are not recognised separately from goodwill, as they are not separately identifiable. Total goodwill recognised in respect of the acquisitions made in 2024 amounted to DKK 2,550 million.

Of the total acquisitions made in 2024, the fair value of the estimated contingent considerations in the form of earn-outs or deferred payments accounted for DKK 387 million (DKK 157 million in 2023).

Earn-outs depend on the results of the acquired entities for a period of 1-4 years. The maximum of earn-outs and other contingent considerations related to the acquisitions are estimated to be DKK 406 million (DKK 159 million in 2023).

The fair values of acquisitions are not considered final until 12 months after the acquisition date. Adjustments to acquisitions completed more than 12 months prior to the time of the adjustments, including changes in estimated contingent considerations, are recognised in the income statement.

In 2024, adjustments were made to the preliminary recognition of acquisitions recognised in 2023. These adjustments relate to payments made, contingent considerations provided as well as net assets and goodwill acquired. The impact of these adjustments on goodwill was DKK 9 million (DKK 5 million in 2023) and DKK -1 million (DKK 2 million in 2023) on contingent consideration.

In 2024, adjustments were also made to contingent considerations related to acquisitions completed more than 12 months prior to the time of the adjustments. These adjustments amount to DKK 35 million (DKK 5 million in 2023) and are recognised as part of distribution costs for acquisitions.

Step-up acquisitions

At the time of acquisition of noncontrolling interests, the shares of the acquisitions are measured at their proportionate share of the total fair value of the acquired entities, including goodwill. On obtaining a controlling interest through step acquisitions, previously held non-controlling interests are, at the time of obtaining control, remeasured at fair value with fair value adjustments recognised in the income statement.

The total impact on the income statement of fair value adjustments of noncontrolling interests in step acquisitions was DKK 337 million (DKK 27 million in 2023).

The statements of fair values of acquisitions are not considered final until 12 months after the acquisition date.

Transaction costs

Transaction costs in connection with acquisitions made in 2024 amounted to DKK 30 million (DKK 14 million in 2023), which were recognised in distribution costs.

Acquired assets and proforma figures

The acquired assets include contractual receivables amounting to DKK 64 million (DKK 59 million in 2023) of which DKK 2 million (DKK 1 million in 2023) was thought

6.1 Acquisition of enterprises and activities – continued

to be uncollectible at the date of the acquisition. Of total goodwill in the amount of DKK 2,550 million (DKK 1,128 million in 2023), DKK 1,328 million (DKK 209 million in 2023) can be amortised for tax purposes.

Revenue and profit after tax generated by the acquired enterprises since acquiring them in 2024 amount to DKK 532 million (DKK 319 million in 2023) and DKK 55 million (DKK 14 million in 2023), respectively. Had such revenue and profit been consolidated on 1 January 2024, it is estimated that consolidated pro forma revenue and profit after tax would have been DKK 29,578 million (DKK 28,586 million in 2023) and DKK 2,424 million (DKK 1,242 million in 2023), respectively. Without taking synergies from our core business into account, we believe that these pro forma figures reflect the level of consolidated earnings after acquisition of the enterprises.

Acquisitions after balance sheet date

From the balance sheet date and until the date of financial reporting in 2025, the Demant Group has acquired a number of enterprises, including 100% of the shares in Ohrwerk Group, which operates 77 hearing clinics across Germany. The Group is in the process of completing the purchase price allocation, including the valuation of intangible assets and

liabilities assumed. The final impact will be reflected in the subsequent reporting period.

Accounting policies

Newly acquired or newly established enterprises are recognised in the consolidated financial statements from the time of acquisition or formation. The time of acquisition is the date when control of the enterprise is transferred to the Group. For Group accounting policies on control, please refer to the consolidated financial statements in Note 9.1. In respect of newly acquired enterprises, comparative figures and key figures will not be restated. On acquiring new enterprises of which the Group obtains control, the purchase method is applied according to which their identified assets, liabilities and contingent liabilities are measured at their fair values on the acquisition date. Any non-current assets acquired for the purpose of resale are, however, measured at their fair values less expected cost of disposal. Restructuring costs are solely recognised in the pre-acquisition balance sheet if they are a liability for the acquired enterprise. Any tax effect of revaluations will be taken into account.

The acquisition cost of an enterprise consists of the fair value of the consideration paid for the enterprise with

the addition of the fair values of previously held interests in the acquiree. If the final consideration is conditional upon one or more future events, the consideration will be recognised at the fair value on acquisition. Any subsequent adjustment of contingent consideration is recognised directly in the income statement, unless the adjustment is the result of new information about conditions prevailing on the acquisition date, and this information becomes available up to 12 months after the acquisition date.

Transaction costs are recognised directly in the income statement when incurred. If the purchase price exceeds the fair values of the assets, liabilities and contingent liabilities identified on acquisition, any remaining positive differences (goodwill) are recognised in the balance sheet under intangible assets and tested for impairment at least annually. If the carrying amount of an asset exceeds its recoverable amount, it is written down to such lower recoverable amount.

If, on the acquisition date, there are any uncertainties with respect to identifying or measuring acquired assets, liabilities or contingent liabilities or uncertainty with respect to determining their cost, initial recognition is made on the basis of provisionally calculated values. Such

provisionally calculated values may be adjusted, or additional assets or liabilities may be recognised up to 12 months after the acquisition date, if new information becomes available about conditions prevailing on the acquisition date, which would have affected the calculation of values on that day, had such information been known.

Accounting estimates and judgements

Identification of assets and liabilities (judgement)

On recognition of assets and liabilities from acquisitions, Management judgements may be required for the identification of the following:

- Intangible assets, resulting from technology, customer relationships, client lists or brand names.
- Contingent consideration arrangements.

Contingent consideration (estimate)
Acquisitions may include provisions to the effect that additional payments of contingent considerations be paid to the previous owners when certain events occur or certain results are obtained.
Management assesses on a regular basis the judgements made in respect of the particular acquisitions, taking sales run rates of the acquired entity into account.

On 5 February 2024, the Demant Group announced the decision to undertake a review of the strategic options for its Communications business. On 14 August 2024, the Demant Group announced the conclusion of the review and, consequently, it was decided to initiate a significant restructuring plan for the Communications business. The process commenced immediately and as part of the restructuring of the Communications business, an impairment of the goodwill of DKK 110 million was recognised as well as other oneoffs. Following the restructuring, the Demant Group intends to carry on with the divestment of the Communications business. The Communications business still meets the criteria for being classified as held for sale and a discontinued operation.

On 21 May 2024, the Demant Group finalised the divestment of the cochlear implants (CI) business to Cochlear Limited after all regulatory approvals and customary closing conditions had been fulfilled. The divestment of the CI business resulted in a loss of DKK 25 million in 2024.

As previously communicated, the boneanchored hearing systems (BAHS) business will currently remain with the Demant Group and continues to be considered a discontinued operation.

In 2024, discontinued operations realised a loss after tax of DKK 504 million, including

the loss relating to the divestment of the CI business. The remaining loss of DKK 479 million is related to a combined net operating loss in the Hearing Implants (CI and BAHS) and Communications business areas.

Accounting policies

Discontinued operations represent a separate line of business disposed of or in preparation for sale. The results of discontinued operations are presented separately in the income statement, and comparative figures are restated. Assets and liabilities of discontinued operations are presented as separate items in the balance sheet, and cash flows from discontinued operations are presented separately in the cash flow statement.

Section 6 Acquisitions and

divestments

2024 2023 (DKK million) **Balance sheet items:** 97 Intangible assets 433 Property, plant and equipment 25 44 Lease assets 47 44 Deferred tax assets Other non-current assets 550 144 Non-current assets **Current assets** 843 139 1,393 **Assets held for sale** 283 46 8 **Provisions** Lease liabilities 46 Other liabilities 252 80 344 Liabilities related to assets held for sale 89

Following the divestment of the CI business, assets classified as held for sale at 31 December 2024 comprise the Communications business and the BAHS business. The comparative figures only include the Hearing Implants business, consisting of both the CI and the BAHS business.

Accounting policies

Assets and liabilities relating to the discontinued operations are classified as held for sale. Assets held for sale, except financial assets etc., and liabilities related to assets held for sale are measured at the lower of their carrying amount and their fair value less costs to sell. Noncurrent assets held for sale are not depreciated.

| Net profit from divestment of enterprises and activities | -90 |

In May 2024, the Demant Group divested its CI business to Cochlear Limited, and no consideration was paid as part of the transaction. As part of the agreement with Cochlear Limited, post-closing review of balances resulted in DKK 25 million being transferred to Demant as part of the net debt adjustment.

At 31 December 2024, the divestment resulted in a loss of DKK 25 million of which DKK 11 million relates to transaction costs. The total transaction costs incurred by the Demant Group in relation to the divestment of the CI business amount to DKK 66 million.

Accounting policies

Gains or losses on the divestment of enterprises and activities are determined as the difference between the selling price and the carrying amount of the net assets divested. Transaction costs and any provisions made for obligations related to the divestment of enterprises and activities are deducted.

| | | |
| Defined benefit obligations recognised in the balance sheet, | 420 | 445 |
| net | 120 | 115 |
| Return on defined benefit assets: | | |
| Actual return on defined benefit assets | 33 | 21 |
| Actuarial gains/losses on defined benefit assets | 33 | 21 |
| | | |
| Assumptions: | | |
| Discount rate | 1.2% | 1.7% |
| Expected return on defined benefit assets | 0% | 0% |
| Future salary increase rate | 1.5% | 1.6% |

Generally, the Group does not offer defined benefit plans, but it has such plans in Switzerland, France and Germany where they are required by law.

Defined benefit plan costs recognised in the income statement amount to DKK 0 million (DKK 12 million in 2023), and the accumulated actuarial loss recognised in the statement of comprehensive income amounts to DKK 7 million (income of DKK 10 million in 2023).

In 2025, the Group expects to pay approximately DKK 22 million (DKK 24 million in 2024) into defined benefit plans. Defined benefit obligations in the amount of DKK 132 million (DKK 132 million in 2023) will mature within 1-5 years and obligations in the amount of DKK 352 million (DKK 324 million in 2023) after five years.

If the discount rate is 0,5% higher (lower), the defined benefit obligation would decrease by 6% (increase by 7%). If the expected salary growth rate is 0,5% higher (lower) the defined benefit obligation would increase by 1% (decrease by 1%).

Plan assets are recognised as follows:
Equity 28%
Bonds 31%

26%

15%

Property

Other

Accounting policies

Provisions are recognised if, as a result of an earlier event, the Group has a legal or constructive obligation, and if the settlement of such an obligation is expected to draw on corporate financial resources, but there is uncertainty about the timing or amount of the obligation. Provisions are measured on a discounted basis based on Management's best estimate of the amount at which a particular liability may be settled. The discount effect of any changes in the present value of provisions is recognised as a financial expense.

The Group has defined benefit plans and similar agreements with some of its employees.

With respect to defined contribution plans, the Group pays regular, fixed contributions to independent pension companies. Contributions are recognised in the income statement for the period in which employees have performed work entitling them to such pension contributions. Contributions due are recognised in the balance sheet as a liability.

With respect to defined benefit plans, the Group is obliged to pay a certain contribution when an employee covered by such a plan retires, for instance a fixed amount or a percentage of the employee's

Section 7 Provisions, other liabilities etc.

7.2 Employee benefit obligations - continued

final salary. An actuarial calculation is prepared periodically of the accrued present value of future benefits to which employees through their past employment with the Group, are entitled and which are payable under the defined benefit plan. This defined benefit obligation is calculated annually using the projected unit credit method on the basis of judgements in respect of the future development in for instance wage levels, interest rates, mortality and inflation rates.

The defined benefit obligation less the fair value of any assets relating to the defined benefit plan is recognised at the balance sheet under provisions.

Defined benefit costs are categorised as follows:

- Service costs, including current service costs, past-service costs as well as gains and losses on curtailments and settlements
- Net interest expense or income
- Remeasurements

Remeasurements, comprising actuarial gains and losses, any effects of changes to the asset ceiling and return on defined benefit assets, excluding interest, are reflected immediately in the balance sheet with a charge or credit recognised in other

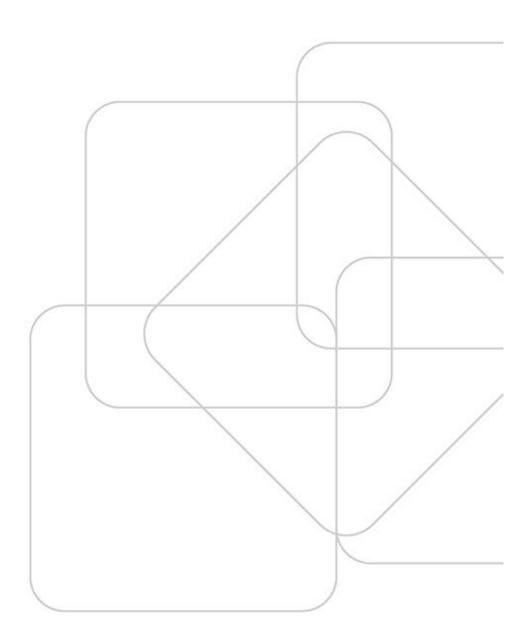

comprehensive income in the period in which it occurs.

Remeasurements recognised in other comprehensive income are reflected immediately in retained earnings and are not reclassified to the income statement. Service costs and net interest expense or income are included in the income statement as staff costs.

Other non-current employee benefits are recognised using actuarial calculation. Actuarial gains or losses on such benefits are recognised directly in the income statement.

Accounting estimates and judgements

Assessment of provisions (estimate) Management assesses, on an ongoing basis, provisions for, among others, restructuring costs and the likely outcomes of pending and probable lawsuits etc. (other provisions). When assessing the likely outcome of lawsuits, Management bases its assessment on internal and external legal advice and established precedent. Provisions for restructuring costs are based on the estimated costs of implementing restructuring initiatives and thus on a number of judgements about future costs and events. For all provisions, the outcome and final expense depend on future events, which are by nature uncertain.

7.3 Other liabilities

| (DKK million) | 2024 | 2023 |
|--------------------------------|-------|-------|
| | | |
| Product-related liabilities | 606 | 620 |
| Staff-related liabilities | 1,466 | 1,383 |
| Other debt, public authorities | 340 | 387 |
| Contingent considerations | 703 | 543 |
| Other costs payable | 1,413 | 1,226 |
| Other financial liabilities | 272 | 298 |
| Other liabilities | 4,800 | 4,457 |
| | | |
| Due within 1 year | 3,443 | 3,335 |
| Due within 1-5 years | 1,357 | 1,122 |

Product-related liabilities include standard warranties and returned products etc. Staff-related liabilities include holiday pay and payroll costs due. The carrying amount of other liabilities approximate the fair value of such liabilities.

Accounting policies

Other non-financial liabilities are recognised if, as a result of an earlier event, the Group has a legal or constructive obligation, and if the settlement of such an obligation is expected to draw on corporate financial resources. Other non-financial liabilities are measured on a discounted basis, and the discount effect of any changes in the present value of the liabilities is recognised as a financial expense.

On the sale of products with a right of return, a refund liability and a right to the returned products are recognised as a refund liability and a current asset (included in prepaid expenses), respectively. The refund liability is deducted from revenue and the right to the returned products is offset in cost of sales. Warranty commitments include the obligation to remedy faulty or defective products during the warranty period.

Other financial liabilities mainly consist of liabilities to acquire additional shares in subsidiaries. The liabilities are measured at fair value through income statement. The fair value is estimated based on valuation principles agreed between the parties.

Accounting estimates and judgements

Warranty and return liabilities (estimates) Liabilities in respect of service packages and warranties are calculated on the basis of information on products sold, related service and warranty periods and past experience of costs incurred by the Group to fulfil its service and warranty liabilities. Liabilities in respect of returns have been calculated based on information on products sold, related rights concerning returns and past experience of products being returned in the various markets. Consolidated product-related liabilities are the sum of a large number of small items, the sum changing constantly due to a large number of transactions.

Section 7 Provisions, other liabilities etc.

Financial report

7.4 Deferred income

| (DKK million) | 2024 | 2023 |
|-----------------------------------|-------|-------|
| Prepayments from customers | 188 | 237 |
| Future performance obligations: | | |
| Deferred warranty-related revenue | 757 | 659 |
| Deferred free products revenue | 219 | 126 |
| Deferred service revenue | 452 | 404 |
| Total | 1,616 | 1,426 |

Accounting policies

Deferred income includes income received or future performance obligations relating to subsequent financial years and is recognised as revenue when the Group fulfils its obligations by transferring the goods or services to the customer.

Some products, some services and some of the warranty-related services mentioned are provided free of charge to the customer.

Certain other services and warrantyrelated services are paid by the customer on delivery of the related goods, but delivery of the service takes place 1-6 years after delivery of the goods.

Please refer to Note 1.1 for a description of the nature of the deferred income.

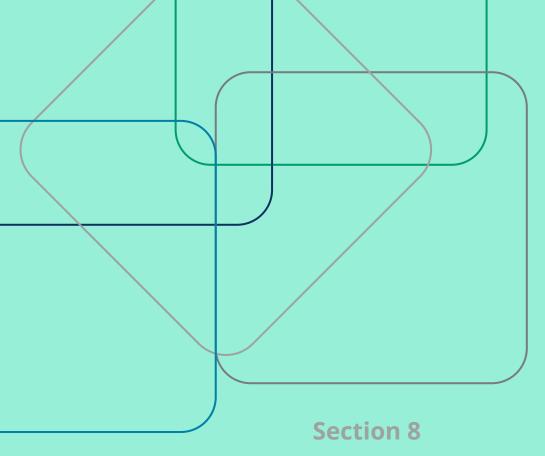

7.5 Contingent liabilities

The William Demant Invest Group is involved in minor litigations, claims, disputes etc. Management is of the opinion that such disputes do not and will not significantly affect the Group's financial position. The Group seeks to make adequate provisions for legal proceedings.

As part of the business activities, the Group has entered into normal agreements with customers and suppliers etc. as well as agreements for the purchase of shareholdings.

Expected recognition of revenue

8.1 Related parties

Insights and highlights

William Demant Foundation, Kongebakken 9, 2765 Smørum, Denmark, is the only related party with a controlling interest. Related parties with significant influence are the Company's Executive Board, Board of Directors and their related parties.

Furthermore, related parties are companies in which the above persons have significant interests.

Subsidiaries, associates, as well as the Group's ownership interests in these companies appear in section 11. For financial information on associates please refer to Note 3.4.

In 2024, William Demant Foundation paid administration fees to William Demant Invest Group of DKK 3 million (DKK 2 million in 2023). Further, the William Demant Foundation loan (convertible promissory notes) to William Demant Invest A/S was converted to equity in December 2023, and hence interest in 2024 totals DKK 0 million (DKK 86 million in 2023).

In 2024, William Demant Foundation donated DKK 2 million (DKK 27 million in 2023) to Eriksholm Research Centre and DKK 6 million (DKK 4 million in 2023) to an industrial PhD project in Oticon A/S. Further, William Demant Foundation acquired diagnostic and hearing aidrelated equipment worth DKK 0 million and DKK 1 million, respectively (DKK 3 million and DKK 6 million in 2023), from the Group.

In 2024, the members of the Executive Board and the Board of Directors received remuneration from Group companies in the amount of DKK 3 million (DKK 3 million in 2023).

There have been no transactions with the Executive Board and the Board of Directors apart from normal remuneration. Please refer to Note 1.2.

8.2 Fees to parent's auditors appointed at the annual general meeting

| (DKK million) | 2024 | 2023 |
|-----------------------------|------|------|
| Statutory audit | 31 | 28 |
| Other assurance engagements | 3 | - |
| Other services | 2 | 1 |
| Total | 36 | 29 |

Some of the Group's subsidiaries are not subject to auditing by PricewaterhouseCoopers.

In 2024, the fee for non-audit services delivered by PricewaterhouseCoopers Statsautoriseret Revisionspartnerselskab, Denmark, amounted to DKK 4 million (DKK 0 million in 2023).

requirements

8.3 Government grants

| (DKK million) | 2024 | 2023 |
|-------------------------------|------|------|
| Government grants by function | | |
| R&D costs | 2 | 16 |
| Distribution costs | 3 | 3 |
| Administrative expenses | - | 1 |
| Total | 5 | 20 |

In 2024, the William Demant Invest Group received government grants in the amount of DKK 5 million (DKK 20 million in 2023).

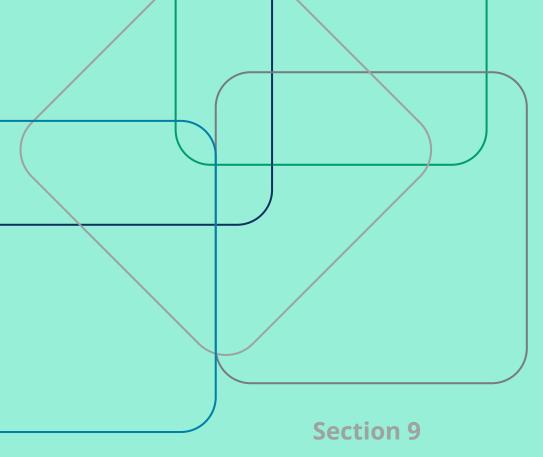

Accounting policies

Government grants are recognised when there is reasonable certainty that the conditions for such grants are satisfied and that they will be awarded. Grants received as compensation for costs incurred are recognised proportionately in the income statement over the periods in which the related costs are recognised in the income statement and are offset against costs incurred. Government grants relating to the acquisition of non-current assets are deducted from the cost of such asset.

8.4 Events after the balance sheet date

On 31 January 2025, The Demant Group acquired 100% of the shares in Ohrwerk Group, which operates 77 hearing clinics across Germany. For further information, see note 6.1.

Apart from the above, no events have occurred after the reporting date of importance to the consolidated financial statements.

Basis for preparation

9.1 Group accounting policies

The Group's general accounting policies are described below. In addition to this, specific accounting policies are described in each of the individual notes to the consolidated financial statements as outlined here:

- 1.1 Revenue
- 1.2 Employees
- 1.5 Inventories
- 1.6 Trade receivables
- 1.7 Customer loans
- 1.9 Specification of special items
- 2.3 Hedging and forward exchange contracts
- 3.1 Intangible assets
- 3.2 Property, plant and equipment
- 3.3 Leases
- 3.4 Other non-current assets
- 3.5 Impairment testing
- 4.2 Net financial items
- 4.3 Categories of financial instruments
- 4.5 Fair value hierarchy
- 5.1 Tax on profit
- 5.2 Deferred tax
- 6.1 Acquisition of enterprises and activities
- 6.2 Discontinued operations and assets held for sale
- 6.3 Divestment of enterprises and activities
- 7.1 Provisions
- 7.2 Employee benefit obligations
- 7.3 Other liabilities
- 7.4 Deferred income
- 8.3 Government grants

General

The consolidated financial statements are presented in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and Danish disclosure requirements for annual reports published by reporting class C (large) companies, cf. the Danish executive order on IFRS issued in compliance with the Danish Financial Statements Act. The registered office of William Demant Invest A/S is in Denmark.

Section 9

Basis for preparation

The consolidated financial statements are presented in Danish kroner (DKK), which is the functional currency of the Parent. The consolidated financial statements are presented based on historical cost, except for obligations for contingent consideration in connection with business combination, share-based remuneration, derivatives and financial asset classified as assets available for sale, which are measured at fair value.

The financial statements for the Parent as well as the Parent's accounting policies are presented separately from the consolidated financial statements and are shown on the last pages of this Annual Report 2024.

Effect of new accounting standards

The Group has adopted the new, amended and revised accounting standards and interpretations as published by the IASB and adopted by the EU effective for the accounting period beginning 1 January 2024. The new, updated and amended standards and interpretations did not result in any changes to the accounting policies for the Group nor had it any significant impact on the consolidated financial statements for 2024.

IASB has issued new accounting standards and amendments effective for accounting periods beginning after 1 January 2025, which have been adopted by the EU. The changes to these standards are not expected to have any significant impact on the Group. In 2024, the IASB issued IFRS 18, which replaces IAS 1. The new accounting standard is not yet adopted by EU and the implications of the new requirements is currently being evaluated. Management expects to adopt the accounting standards and interpretations as they become mandatory.

The Group has applied the exception to recognise deferred tax on OECD's/EU's Pillar Two Model Rules and local implementation hereof.

Except for the implementation of the new and amended standards and update to

the cash flow statement, the accounting policies remain unchanged compared to last year.

Consolidated financial statements

The consolidated financial statements comprise William Demant Invest A/S (the Parent) and the enterprises in which the Parent can or does exercise control by either directly or indirectly holding more than 50% of the voting rights, or in which the Parent exercises control in some other manner. Enterprises in which the Group holds 20-50% of the voting rights and/or in some other manner can or does exercise significant influence are considered associates and are incorporated proportionately into the consolidated financial statements using the equity method.

Consolidation principles

The consolidated financial statements are prepared based on the financial statements of the Parent and its subsidiaries by aggregating uniform items. Enterprises that, by agreement, are managed jointly with one or more other enterprises are recognised using the equity method.

The consolidated financial statements are prepared in accordance with the Group's accounting policies. Intra-group income, expenses, shareholdings, balances and dividends as well as unrealised intra**Basis for preparation**

9.1 Group accounting policies - continued

group profits on inventories are eliminated.

The accounting items of subsidiaries are recognised 100% in the consolidated financial statements.

On initial recognition, non-controlling interests are measured either at fair value or at their proportionate share of the fair value of the identifiable assets, liabilities and contingent liabilities of the acquired subsidiary. The method is chosen for each individual transaction. Non-controlling interests are subsequently adjusted according to their proportionate share of changes in equity of the subsidiary.

Comprehensive income is allocated to non-controlling interests whether or not, as a result hereof, the value of such interests is negative. The purchase or sale of non-controlling interests in a subsidiary, which does not result in obtaining or discontinuing control of such subsidiary, is treated as an equity transaction in the consolidated financial statements, and any difference between the consideration and the carrying amount is allocated to the Parent's share of the equity.

Foreign currency translation

The Group's presentation currency is Danish kroner.

On initial recognition, transactions in foreign currencies are translated at the exchange rates prevailing at the date of the transaction. The functional currencies of the enterprises are determined by the economic environment in which the enterprises operate, normally the local currency.

Receivables, payables and other monetary items in foreign currencies are translated into Danish kroner at the exchange rates prevailing at the balance sheet date. Realised and unrealised foreign currency translation adjustments are recognised in the income statement under gross profit or net financial items, depending on the purpose of the underlying transaction.

Property, plant and equipment, intangible assets, inventories and other non-monetary assets purchased in foreign currencies and measured on the basis of historical cost are translated at the exchange rates prevailing at the transaction date. Non-monetary items, which are revalued at their fair values, are translated using the exchange rates at the revaluation date.

On recognition in the consolidated financial statements of enterprises presenting their financial statements in a functional currency other than Danish kroner, the income statement is translated using average exchange rates

for the months of the year in question, unless they deviate materially from actual exchange rates at the transaction dates. In case of the latter, actual exchange rates are applied.

Balance sheet items are translated at the exchange rates prevailing at the balance sheet date. Goodwill is considered as belonging to the acquired enterprise in question and is translated at the exchange rate prevailing at the balance sheet date.

All foreign currency translation adjustments are recognised in the income statement, except for the following, which are recognised in other comprehensive income:

- The translation of income statements of foreign subsidiaries using monthly average exchange rates for the respective months of the year, whereas balance sheet items of such foreign subsidiaries are translated using exchange rates prevailing at the balance sheet date.
- The translation of non-current, intragroup receivables that are considered to be an addition to or deduction from net investments in foreign subsidiaries.
- The translation of investments in associates.

Income statement

Income and costs are recognised on an accruals basis. The income statement is broken down by function, and all costs, including depreciation, amortisation and impairment losses, are therefore charged to production, distribution, administration and R&D.

Production costs

Production costs are costs incurred to generate revenue. Distribution companies recognise cost of goods sold as part of production costs. Production companies recognise cost of raw materials, consumables, production staff as well as maintenance of and depreciation, amortisation and impairment losses on property, plant and equipment and intangible assets used in the production process as part of production costs.

R&D costs

Research costs are always recognised in the income statement as such costs incur. Development costs include all costs not satisfying capitalisation criteria, but incurred in connection with development, prototype construction, development of new business concepts and amortisation of capitalised development costs.

Distribution costs

Distribution costs include costs relating to training, sales, marketing, promotion materials, distribution, bad debts as well

Basis for preparation

9.1 Group accounting policies - continued

as depreciation, amortisation and impairment losses on assets used for distribution purposes.

Administrative expenses
Administrative expenses include
administrative employee costs, office
expenses as well as depreciation and
amortisation of and impairment losses on
assets used for administrative purposes.

Other operating income
Other operating income includes income
from all activities not related to the core
business activities of the Group.

Prepaid expenses

Prepaid expenses recognised as part of assets include costs relating to the subsequent financial years. Prepaid expenses are measured at cost.

Equity

Foreign currency translation reserve includes foreign currency translation adjustments on the translation of financial statements of foreign subsidiaries and associates from their respective functional currencies into Danish kroner. Foreign currency translation adjustments are recognised in the income statement on realisation of the net investment. Hedging reserves include fair value adjustments of derivatives and loans satisfying the criteria for hedging of future transactions. The amounts are recognised in the income

statement or the balance sheet at the same time as hedged transactions are recognised.

Treasury shares and dividend

On the buy-back of shares or sale of treasury shares, the purchase price or selling price, respectively, is recognised directly in equity as other reserves (retained earnings). A capital reduction through the cancellation of treasury shares will reduce the share capital by an amount corresponding to the nominal value of such shares. Proposed dividends are recognised as a liability at the time of adoption at the annual general meeting.

Cash flow statement

The cash flow statement is prepared according to the indirect method and reflects the consolidated net cash flow broken down into operating, investing, and financing activities.

Cash flow from operating activities includes inflows from the year's operations adjusted for non-cash operating items, changes in working capital, financial income received, financial expenses paid and income tax paid. Cash flow from operating activities also includes short-term lease payments, lease payments of low-value assets and variable lease payments.

Cash flow from investing activities includes payments in respect of the acquisition or divestment of enterprises and financial assets as well as the purchase, development, improvement or sale of intangible assets and property, plant and equipment. In addition to this, cash flow from investing activities also includes movement in receivables from associates as well as customer loans.

Cash flow from financing activities includes payments to and from shareholders and the raising and repayment of non-current and current debt and lease liabilities. Repayment of lease liabilities are included as well.

Cash flow in currencies other than the functional currency is recognised at average exchange rates for the months of the year unless they deviate significantly from actual exchange rates on the transaction dates.

Cash and cash equivalents are cash less overdrafts, which consist of uncommitted bank facilities that often fluctuate from positive to overdrawn. Any short-term bank facilities that are consistently overdrawn are considered cash flow from financing activities.

In 2024, the Group changed its principles related to the elimination of transactions between discontinued and continued

operations, which changes the presentation of the cash flow for discontinued operations.

Financial report Section 9 Basis for preparation

9.1 Group accounting policies - continued

Key figures and financial ratios

| EBITDA | Operating profit before amortisation, depreciation and impairment losses. |
|--------------------------------------|--|
| EBIT before special items | Operating profit before special items |
| EBIT | Operating profit |
| Net interest- bearing debt (NIBD) | Net amount of borrowings and lease liabilities less interest-bearing receivables and cash. |
| Free cash flow | Cash flow from operating activities (CFFO) and investing activities (CFFI) before acquisitions and disposals of enterprises, participating interests and activities. |
| Gross profit margin | Gross profit *100 |
| | Revenue |
| EBITDA margin | Operating profit before amortisation, depreciation and impairment losses *100 |
| | Revenue |
| EBIT margin | Operating profit *100 |
| | Revenue |
| Return on equity | Profit for the year attributable to William Demant Invest A/S' shareholder |
| | Average equity attributable to William Demant Invest A/S' shareholder adjusted for share buy-backs |
| Equity ratio | Equity |
| | Assets |

Financial ratios are calculated in accordance with "Recommendations and Ratios" from CFA Society Denmark.

9.2 Accounting estimates and judgements

On the preparation of the consolidated financial statements, Management makes a number of accounting estimates and judgements. These relate to the recognition, measurement and classification of assets and liabilities. Many items can only be estimated rather than accurately measured. Such estimates are based on the most recent information available on preparation of the financial statements. Estimates and judgements are therefore reassessed on an ongoing basis. Actual figures may, however, deviate from these estimates. Any changes in accounting estimates will be recognised in the reporting period in which such changes are made.

Significant accounting estimates and judgements are described in the individual notes to the consolidated financial statements as outlined below:

- 1.5 Inventories
- 3.3 Leases
- 5.2 Deferred tax

Specific accounting estimates and judgements are described in each of the individual notes to the consolidated financial statements as outlined below:

- 1.1 Revenue
- 1.5 Inventories
- 1.6 Trade receivables
- 1.7 Customer loans
- 1.9 Specification of special items
- 3.1 Intangible assets
- 3.2 Property, plant, and equipment
- 3.3 Leases
- 3.5 Impairment (identification of CGUs)
- 5.2 Deferred tax
- 6.1 Acquisition of enterprises and activities
- 7.2 Employee benefit obligations
- 7.3 Other liabilities

As of 1 January 2023, INVISIO has been transferred from Other Investments to Investments in associates.

10.5 Contingent liabilities

William Demant Invest A/S is the administration company of the joint taxation arrangement with the Danish subsidiaries in the William Demant Invest Group and is under an unlimited and joint liability regime for all Danish tax payments and withholding taxes on dividends, interests and royalties from the jointly taxed entities.

10.6 Proposed distribution of net profit

Section 10 Notes to parent financial statement

| (DKK million) | 2024 | 2023 |
|-------------------|------|-------|
| Retained earnings | 422 | 1,074 |
| Total | 422 | 1,074 |

10.7 Related parties

William Demant Foundation, Kongebakken 9, 2765 Smørum, Denmark, is the only related party with a controlling interest. Related parties with significant influence are the Company's Executive Board, Board of Directors and their related parties.

Furthermore, related parties are companies in which the above persons have significant interests.

In 2024, William Demant Invest A/S paid management fee to Demant A/S of DKK 3 million (DKK 2 million in 2023) and received management fee income from Demant A/S of DKK 7 million (DKK 6 million in 2023).

During 2024, William Demant Invest A/S sold shares in Demant A/S to William Demant Foundation amounting to DKK 0 million (DKK 383.2 million in 2023). Further, William Demant Invest A/S acquired shares in INVISIO AB from William Demant Foundation amounting to DKK 0 million (DKK 382.4 million in 2023).

During the year, William Demant Invest A/S sold shares in Demant A/S to Demant A/S amounting to DKK 227 million (DKK 389.7 in 2023) as part of the share buyback programme in Demant A/S.

During 2024, William Demant Invest A/S made a capital contribution to WDI 2 ApS, a subsidiary of William Demant Invest A/S, for expenses in the amount of DKK 22.5 million (DKK 0 million in 2023).

All transactions were conducted on market terms.

10.8 Shareholder

The entire share capital is owned by William Demant Foundation, Kongebakken 9, 2765 Smørum, Denmark.

10.9 Events after the balance sheet date

Please refer to Note 8.4.

10.10 Parent accounting policies

The financial statements for the Parent, William Demant Invest A/S, are presented in accordance with the provisions of the Danish Financial Statements Act for class C (large) entities.

The Parent financial statements are presented in Danish kroner (DKK), which is also the functional currency for the Parent. The accounting policies are the same as last year.

The Parent's accounting policies in respect of recognition and measurement are generally consistent with the Group's accounting policies. The instances in which the Parent's accounting policies deviate from those of the Group are described in the following.

Income Statement

Tax

The Parent is administration company in the joint taxation with the Danish subsidiaries in the William Demant Invest Group. Current income tax is allocated to the jointly taxed Danish companies in proportion to their taxable incomes.

The Parent's tax for the year is comprised by tax of the Parent's taxable income for the year, changes to deferred tax and any adjustments for tax on taxable income for previous years. Tax for the year is recognised in the income statement, unless the tax relates to items recognised in equity.

Balance Sheet

Investments in subsidiaries and associates Investments in subsidiaries and associates are recognised and measured at cost. If cost exceeds the recoverable value, write down to the lower recoverable value will be made. Dividends from investments in subsidiaries and associates are recognised as income in the Parent's income statement under financial income in the financial year in which the dividends are declared.

Other investments

On initial recognition, other investments are measured at cost. Subsequently, they are measured at their fair values on the balance sheet date and any changes in fair values are recognised in the income statement under net financial items.

Loans to and receivables from subsidiaries Loans to and receivables from subsidiaries are recognised at amortised cost and subsequently measured after deduction of allowance for losses based on an individual assessment. **Section 11**
